About Quantum BioPharma Ltd.

Quantum BioPharma Ltd. (formerly, FSD Pharma Inc.) ("Quantum" or the "Company") is a biopharmaceutical company dedicated to building a portfolio of innovative assets and biotech solutions for the treatment of challenging neurodegenerative, inflammatory and metabolic disorders and alcohol misuse disorders with drug candidates in different stages of development.

Through its wholly owned subsidiary, Lucid Psycheceuticals Inc. ("Lucid"), Quantum is focused on the research and development of its lead compound, Lucid-MS (formerly Lucid-21-302) ("Lucid-MS"). Lucid-MS is a patented new chemical entity that has been shown to prevent and reverse myelin degradation, the underlying mechanism of multiple sclerosis, in preclinical models.

The Company has also licensed its proprietary formulation, Unbuzzd, a blend of natural ingredients, vitamins, and minerals designed to support liver and brain function for the purpose of quickly relieving individuals from the effects of alcohol consumption. On July 31, 2023, the Company entered into an exclusive intellectual property license agreement (the "IP License Agreement") with Celly Nutrition Corp. ("Celly"), which changed its name to Unbuzzd Wellness Inc. ("Unbuzzd") effective May 23, 2025. The agreement grants Unbuzzd the rights to this formulation and certain associated trademarks for consumer product development and marketing.

In exchange for these rights, Quantum received 200,000,000 common shares of Unbuzzd (following a 2:1 share split) and an anti-dilution warrant certificate, initially representing a 34.66% ownership interest. The Company is also entitled to license fees and royalties on revenue generated from products created using the licensed technology. In November 2023, through a Plan of Arrangement, the Company distributed a portion of its Unbuzzd shares (45,712,529) to its own shareholders. As a result of this distribution and subsequent dilution, as of March 31, 2026, the Company held a 19.84% (December 31, 2025 – 19.84%) ownership interest in Unbuzzd. Consequently, the interim condensed consolidated financial statements incorporate the assets, liabilities, results of operations, and cash flows of Unbuzzd for the three months ended March 31, 2026.

Furthermore, on July 31, 2023, the Company entered into a loan agreement with Unbuzzd for gross proceeds of C\$1,000,000, which was amended on April 3, 2024, for an additional C\$300,000. The loan accrues interest at 10% per annum and matures on July 31, 2026. In addition to the Unbuzzd program, the Company continues its internal research and development of novel formulations for the treatment of alcohol misuse for potential application in hospitals and other medical practices. The Company also maintains selective R&D programs for inflammatory diseases (FSD-PEA) and depression (Lucid-PSYCH), though these initiatives remain secondary priorities.

In addition to its core biopharmaceutical activities, the Company had historically maintained a portfolio of strategic residential investments through its wholly owned subsidiary, FSD Strategic Investments Inc. ("FSD Strategic Investments"), which focused on issuing loans secured by residential real estate properties. During the year ended December 31, 2025, the entire portfolio of these loan receivables was sold to a related party. As of March 31, 2026, the Company no longer holds any loans secured by residential properties.

Finally, the Company expanded its corporate treasury management function to include investments in cryptocurrencies. This initiative is aligned with the Company's financial diversification goals and supports its long-term strategic objectives.

On August 15, 2024, the Company consolidated its class A multiple voting shares ("Class A Multiple Voting Shares") and class B subordinate voting shares ("Class B Subordinate Voting Shares") on a 65:1 basis and changed its name to "Quantum

BioPharma Ltd." with a new trading symbol "QNTM" on both the Nasdaq Stock Market LLC ("Nasdaq") and the Canadian Securities Exchange (the "CSE").

The Class B Subordinate Voting Shares are "restricted securities" within the meaning of such term under applicable Canadian securities laws, as these securities do not carry equal voting rights as compared with the Class A Multiple Voting Shares. For more information, please refer to the section titled "Outstanding Share Data".

The Company's registered office is located at 1 Adelaide Street East, Suite 801, Toronto, Ontario, M5C 2V9, and its telephone number is +1-833-571-1811.

The RSU Grant and the Option Grant, as they relate to the directors of the Company, constitutes a "related party transaction", as such term is defined in Multilateral Instrument 61-101 - Protection of Minority Shareholders in Special Transactions ("MI 61-101") due to the grants to the directors, who are members of the Board, and would require the Company to receive minority shareholder approval for, and obtain a formal valuation for the subject matter of, the transaction in accordance with MI 61-101, prior to the completion of the RSU Grant and the Option Grant, as they relate to the directors of the Company. In its consideration and approval of the RSU Grant and the Option Grant, as they relate to the directors of the Company, the Board determined that the RSU Grant and the Option Grant, as they relate to the directors of the Company, were exempt from the formal valuation and minority approval requirements of MI 61-101. The Company has relied on exemptions from the formal valuation and minority shareholder approval requirements of MI 61-101 contained in respectively, sections 5.5(a) and 5.7(1)(a) of MI 61-101 in respect of related party participation in the RSU Grant and the Option Grant, as they relate to the directors of the Company, as neither the fair market value (as determined under MI 61-101) of the subject matter of, nor the fair market value of the consideration for, the transaction, insofar as it involved the related parties, exceeded 25% of the Company's market capitalization (as determined under MI 61-101).

The Company did not file a material change report more than 21 days before the RSU Grant and the Option Grant, as they relate to the directors of the Company, because the details of the grants to related parties to the Company were not settled until shortly prior to the grants. The Company wished to proceed on an expedited basis for business reasons.

LEGAL PROCEEDINGS

The Company is engaged in certain legal proceedings, as further described below. Litigation has been, and is expected to be, costly and time-consuming and could divert the attention of management and key personnel from our business operations. Although we intend to vigorously defend ourselves against any pending claims, and future claims that may occur, we cannot assure that we will succeed in defending any of these claims and that the judgments will not be upheld against us. If we are unsuccessful in our defense of these claims or unable to settle the claims in a manner satisfactory to us, we may be faced with outcomes that could have a material adverse effect on the Company and its financial condition. Except as otherwise disclosed below, there are no material outstanding legal proceedings or regulatory actions to which the Company is party, nor, to Company's knowledge, are there any such proceedings or actions contemplated.

GBB Drink Lab Litigation

On May 12, 2023, the Company announced that it had received a lawsuit filed in S.D. Fla. by GBB against the Company, alleging breach of a mutual non-disclosure agreement and misappropriation of trade secrets. GBB claimed that its assets were valued at US\$53,047,000 as of August 30, 2022 (prior to the misappropriation and material breach).

On June 23, 2023, the Company filed a motion to dismiss the complaint. On July 3, 2023, GBB responded in opposition to the Company's motion to dismiss the complaint. On August 24, 2023, the parties filed a proposed joint scheduling report with the S.D. Fla., which set forth various deadlines that would govern this action. Under the proposed joint schedule, the case was supposed to be trial-ready by November 30, 2024. On January 8, 2024, the S.D. Fla. denied the Company's request to dismiss the lawsuit.

On January 22, 2024, the Company filed a third-party complaint against Joseph Romano (a former director of the Company) and a counterclaim against GBB. The Company alleged that Mr. Romano breached his fiduciary duty by providing or fabricating confidential information to GBB, and that GBB aided and abetted this breach. On October 9, 2024, Judge Melissa Damian denied Mr. Romano's motion to dismiss, finding that the Company plausibly alleged Romano breached fiduciary duties, including his duties of loyalty, confidentiality, and to act in the company's best interests. GBB and Romano then denied the allegations in their respective answers.

Discovery concluded in July 2025, and on July 21, 2025, the parties filed various pre-trial motions, including summary judgment motions. On October 9, 2025, the Court granted the motion for the Company's current counsel, Given Pursley LLP, to appear, officially appointing them and relieving prior counsel, Blank Rome LLP. A status conference was held on December 16, 2025, where the Court ruled on several pending motions. The Court granted Mr. Romano's motion for summary judgment, dismissing all claims against him. The Court reserved ruling on the Company's motion for summary judgment, ordering supplemental briefing on the issue of whether GBB has standing to pursue its claims after selling its assets to a third party. The trial, previously set for January 2026, has been continued.

The parties filed supplemental briefs addressing standing in accord with the Court's order. But GBB then filed a reply brief. On February 17, 2026, the Company filed a motion to strike GBB's reply brief and accompanying exhibits, arguing that the filing was unauthorized. On February 18, 2026, GBB filed a response in opposition to the motion to strike. On March 24, 2026, the Court denied the motion to strike, and the Court denied the Company's motion for summary judgment. Trial was set to begin the week of May 18, 2026, but the parties jointly have requested a sixty-day continuance. No subsequent event occurred as of the date of this report.

Raza Bokhari

On May 21, 2025, the Company entered into a comprehensive settlement agreement with Dr. Raza Bokhari, its former CEO, resolving all outstanding litigation in Canada and the U.S. This concludes disputes originating from Dr. Bokhari's 2021 termination and subsequent legal actions, including:

- A wrongful dismissal arbitration (initially claiming \$30.2 million), dismissed in 2022 with costs awarded to the Company.
- Multiple court proceedings related to share cancellations, indemnification claims, and U.S. enforcement of arbitration awards.

Quantum received a one-time payment of \$2,350,000, recorded as other income during the second quarter of 2025. All outstanding cost awards and claims were mutually waived.

This settlement eliminated all future legal uncertainties and associated costs as announced in the Company's May 30, 2025 press release, which confirmed a \$2.35 million payment from Dr. Bokhari to fully resolve all outstanding claims in Canada and the United States.

Deferred Income

On December 24, 2024, the Company entered into a Prepaid Forward Purchase Agreement (the "Purchase Agreement") with Sports Coat LLC ("Buyer"). Under the terms of the agreement, the Buyer agreed to provide financing of US\$1,000,000 to the Company in exchange for the right to receive a portion of the proceeds from certain ongoing litigations.

These litigations include, but are not limited to, claims relating to either:

- Alleged market manipulation involving FSD Pharma Inc., Quantum BioPharma Ltd., or any other related entity; or
- Matters involving Dr. Raza Bokhari.

The financing provided under the Purchase Agreement is non-recourse, which stipulates that the Company is not obligated to repay the \$1,000,000 if no proceeds are realized from the litigations. The Buyer assumes the risk of loss in the event of non-collection of litigation proceeds. The agreement does not include a predefined repayment schedule, a specified due date, or a general pledge of the Company's assets as collateral for repayment.

The Purchase Agreement specifies events of default, including failure to pay amounts due, breach of material terms, termination of legal representation without cause, misrepresentation, misappropriation of litigation proceeds, insolvency, or challenges to the agreement's validity. In such cases, the Buyer may declare the full amount immediately due and enforce its security interest.

The Company received the full \$1,000,000, which has been recorded as deferred income as at December 31, 2024.

During the year ended December 31, 2025, the Company received \$2,350,000 in litigation proceeds as part of a settlement related to the Raza Bokhari Claims. In accordance with the agreement with the Buyer, the Company paid \$1,420,000 to the Buyer, representing the full repayment of the principal and the additional return calculated under the Purchase Agreement. The \$1,000,000 initially recorded as deferred income was recognized as other income during the year ended December 31, 2025. The remaining settlement proceeds of \$930,000 were also recognized as other income.

Lawsuit against CIBC World Markets, RBC Dominion Securities, and John Does 1-10

On October 20, 2024, the Company filed a complaint in the U.S. District Court for the Southern District of New York against CIBC World Markets, Inc., RBC Dominion Securities Inc., and John Does 1-10. The complaint alleges market manipulation through spoofing activities between January 1, 2020, and August 15, 2024. The Company is seeking damages of more than US\$700 million. On May 1, 2025, the Company filed an amended complaint, in response to the Motion to Dismiss filed by the banks on January 31, 2025.

The complaint alleges that between January 1, 2020, and August 15, 2024, the defendants engaged in "spoofing," an unlawful trading practice, to manipulate the market price of Quantum's shares. The complaint details that the defendants placed thousands of spoofing orders to sell, creating the illusion that Quantum's share price was declining. This practice allegedly "tricked" other investors into selling their shares at lower prices, driving the Company's share price downward. The defendants then purchased shares at artificially depressed prices, positioning themselves to profit when the market price rebounded. The Company claims to have suffered significant damage and seeks to recover more than USD 700 million. It alleges that it sold approximately 90 million shares of its stock on U.S. and Canadian exchanges during the relevant period at artificially depressed prices due to the defendants' spoofing activities. The complaint names CIBC World Markets, Inc., RBC Dominion Securities Inc., and John Does 1 through 10 as defendants. It asserts three claims for relief: violation of Section 10(b) of the Securities Exchange Act of 1934 and Rule 10b-5(a) and (c), violation of Section 9(a)(2) of the Securities Exchange Act of 1934, and New York Common Law Fraud.

The defendants filed a motion to dismiss on June 16, 2025. On March 30, 2026, the United States District Court for the Southern District of New York largely ruled against defendants. Subsequent to March 30, 2026, no further events occurred as of the date of this report.

Additional Regulatory Matters

In response to OSC inquiries regarding our securities trading activity, the Company has maintained an active investigation into potential market irregularities. We provide historical context regarding this ongoing matter, which is an important aspect of our regulatory compliance efforts.

Quantum Response to OSC Inquiry

On August 11, 2023, external legal counsel sent a letter to the Ontario Securities Commission ("OSC"). This letter was in response to a comment letter from the OSC regarding the Company's Preliminary Short Form Base Shelf Prospectus filed on July 11, 2023. The letter addressed inquiries from the OSC about the Company's investigation into possible naked short selling and market manipulation of the Company's securities.

Key points of the letter:

- The Company's external counsel and Christian Attar (collectively referred to as "Law Firms") were jointly representing Quantum in the matter concerning possible naked short selling and market manipulation of the Company's securities.
- Quantum had first suspected share price manipulation in 2021 when it discovered imbalances between reported shares held by brokers and authorized shares on deposit in both Canadian and U.S. exchanges.
- The Board of Directors discussed naked short selling and market manipulation in a meeting on June 29, 2023, and decided to retain Christian Attar.
- Other than an information package submitted to the OSC on June 23, 2023, Quantum had not been in contact with other regulatory bodies regarding this matter.
- The investigation was ongoing at the time, with the Law Firms reviewing documents, trading data, and interviewing witnesses.
- The Company has an Insider Trading and Blackout Period policy, but the disclosure of the possible naked short selling and market manipulation did not trigger a blackout period.
- The letter emphasized the preliminary nature of the investigation and its ongoing status. It stated that it was premature to identify any parties or individuals who might be implicated in the matter. Furthermore, the Law Firms were unable to provide an accurate timeline for the completion of their investigations at that point.

- The letter also noted that any decision regarding potential litigation against third parties would depend on the investigation's findings and could not be determined until the inquiry was concluded.

FINANCIAL INSTRUMENTS AND OTHER INSTRUMENTS

Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations and arises principally from deposits with banks and outstanding other receivables and finance receivables. The Company trades only with recognized, creditworthy third parties.

The Company does not hold any collateral as security for its outstanding finance receivables but mitigates this risk by dealing only with, what management believes to be, financially sound counterparties and, accordingly, does not anticipate significant loss for non-performance. The loans are secured by residential properties, and the Company is granted a first or second collateral charge mortgage on the properties for a sum equal to the interest payments plus the principal amount. The Company performs assessments on factors such as timing of payments, loan to value ratios, communications with the borrower and external macro factors such as interest rates and economic conditions to mitigate risks.

Liquidity risk

Liquidity risk is the risk the Company will not be able to meet its financial obligations as they come due. The Company's exposure to liquidity risk is dependent on the Company's ability to raise additional financing to meet its commitments and sustain operations. The Company mitigates liquidity risk by management of working capital, cash flows, the issuance of share capital and if desired, the issuance of debt. The Company's trade and other payables are all due within twelve months from the date of these financial statements.

If unanticipated events occur that impact the Company's ability to carry out the planned clinical trials, the Company may need to take additional measures to increase its liquidity and capital resources, including issuing debt or additional equity financing or strategically altering the business forecast and plan. In this case, there is no guarantee that the Company will obtain satisfactory financing terms or adequate financing. Failure to obtain adequate financing on satisfactory terms could have a material adverse effect on the Company's results of operations or financial condition.

Market risk

Market risk is the risk the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: foreign currency risk, interest rate risk and other price risk.

- Foreign currency risk

Foreign currency risk arises on financial instruments that are denominated in a currency other than the functional currency in which they are measured. The Company's primary exposure with respect to foreign currencies is from Canadian dollar

denominated cash and trade and other payables. A 1% change in the foreign exchange rates would not result in any significant impact to the financial statements.

- Interest rate risk

Interest rate risk is the risk the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company’s finance receivables are at fixed rates and there are no material long-term borrowings outstanding. The Company is not exposed to interest rate risk as at March 31, 2026.

- Other price risk

Other price risk is the risk the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market. The Company is not exposed to other price risk as at March 31, 2026.

Fair values

The carrying values of cash, other receivables (excluding sales tax recoverable), trade and other payables, and notes payable approximate fair values due to the short-term nature of these items, or they are being carried at fair value or, for, notes payable, interest payables and convertible debentures are close to the current market rates. The risk of material change in fair value is not considered to be significant. The Company does not use derivative financial instruments to manage this risk.

Financial instruments recorded at fair value on the consolidated statement of financial position are classified using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The Company categorizes its fair value measurements according to a three-level hierarchy. The hierarchy prioritizes the inputs used by the Company’s valuation techniques. A level is assigned to each fair value measurement based on the lowest-level input significant to the fair value measurement in its entirety. The three levels of the fair value hierarchy are defined as follows:

- Level 1 – Unadjusted quoted prices as at the measurement date for identical assets or liabilities in active markets.
- Level 2 – Observable inputs other than quoted prices included in Level 1, such as quoted prices for similar assets and liabilities in active markets; quoted prices for identical or similar assets and liabilities in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.
- Level 3 – Significant unobservable inputs that are supported by little or no market activity. The fair value hierarchy also requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value.

The fair value hierarchy requires the use of observable market inputs whenever such inputs exist. A financial instrument is classified to the lowest level of the hierarchy for which a significant input has been considered in measuring fair value. Investments are measured using level 1 and level 2 inputs. Digital assets, warrant liabilities and derivative liabilities are measured using level 2 inputs. During the three months ended March 31, 2026, there were no transfers of amounts between levels.

The effectiveness of our disclosure controls and procedures and our internal control over financial reporting is subject to various inherent limitations, including cost limitations, judgments used in decision making, assumptions about the likelihood of future events, the soundness of our systems, the possibility of human error, and the risk of fraud. Moreover, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions and the risk that the degree of compliance with policies or procedures may deteriorate over time. Because of these limitations, there can be no assurance that any system of disclosure controls and procedures or internal control over financial reporting will be successful in preventing all errors or fraud or in making all material information known in a timely manner to the appropriate levels of management.
