ACCESSORY TO BE ORDERED WITH THE UNIT  
 (NO SEPARATE CODING)

unit and components  
 protected by

PATENT PENDING  
 REF. NO. 10202000010019

**main features**■ **MAIN FEATURES :**

This accessory helps to sanitize the air by recirculating (Air RE-Circulation).

The accessory is positioned on the left hand side compartment. The sanitification is made by UVC.

Safe operation is granted by strict control and regulation of the operation.

The accessory has been sized to achieve sanitisation of air by ensuring over 95% of elimination of the viruses (more susceptible), bacteria, spores following ASHRAE HANDBOOK 2016 § 17 recommendations.

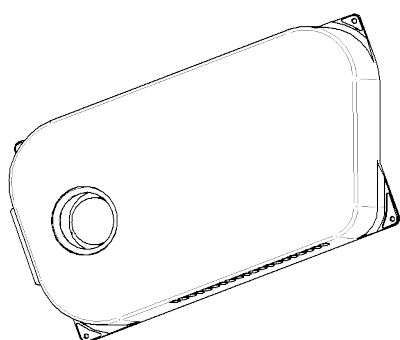

■ **INSTALLATION REQUIREMENTS**

the regulation and supply is ready to be integrated with the harness of the unit.

The setting of the operation is made possible by the KTS (remote control).

Once the accessory operation is set the accessory can operate without remote control.

The accessory has ion sensor to avoid ionisation of the sanitized air
