

Structural Engineering Internship

Trotter and Associates, Inc. has developed an expert group of professionals and is seeking qualified individuals to join our team.

Trotter and Associate, Inc.'s structural engineering department is seeking sophomore or juniors interested in a career in structural engineering. This position will work directly with the Chief Structural Engineer and include assisting with design, performing basic structural calculations and performing field inspections to gain a better understanding of the field. TAI's projects include concrete tankage and structures, structural framing, retaining walls, and industrial buildings.

Team Members Qualities:

- Professional/Hard Working
- Organized
- Accountable
- Good Listeners
- Effective Communicators
- Strong Problem Solving Skills
- Sound Advisers
- Engaging Presenters
