

SENIOR STRUCTURAL ENGINEER

Trotter and Associates, Inc. is an established civil/ environmental engineering and surveying firm based in St. Charles, Illinois. The firm was originally founded based on its expertise in water/wastewater engineering. The firm has expanded its services to include traditional Civil/Site, as well as Watershed Resources and Utility Infrastructure Rehabilitation. Currently, TAI serves over 80 municipalities throughout northern Illinois and southern Wisconsin.

Trotter and Associates, Inc. has an excellent reputation for working closely with our clients to develop project specific solutions that meet each community's individual needs. The firm's client base and workload has continued to expand at an unprecedented rate. TAI has developed a strategic plan to facilitate the continued expansion of the firm. As part of that Strategic Plan, TAI has begun to assemble an ASME support services team for our Water/Wastewater Division, with the goal of expanding services beyond WET to other areas of municipal services including Public Works, Police, Fire Stations, etc. Our goal is to develop elite team of architects, structural, electrical, and mechanical engineers within the next eighteen months.

TASKS AND RESPONSIBILITIES

We are seeking a Senior Structural Engineer with experience in design and construction of concrete and steel tankage, masonry buildings, concrete structures, steel frame structures (ie walkways, stairs, pipe supports, etc), with expertise in water and wastewater treatment facilities. This position will also be required to provide structural engineering consistent with the long term goal of supporting ASME services for a broader range of projects. This opportunity is reserved for someone who can make an immediate impact and that is seeking a long term career solution. The functions of the position include developing the basis of design, coordination of structural elements in support of process design, directing the design team for preparation of drawings and specifications, as well as support of construction phase services. Please note, US citizenship is required, as the firm does not currently have the infrastructure to support sponsorship.

The candidate must have demonstrated technical expertise with a wide range of civil infrastructure projects and extensive experience serving municipal clients. This individual will report directly to the Chief Structural Engineer and will likely be required to make presentations to clients and elected officials on a regular basis. Furthermore, this individual will be responsible for preparation of proposals, tracking productivity, monitoring project schedules and budgets. As such this individual must possess outstanding work ethic, excellent communication skills and understand the use of multiple leadership styles.
