

Make better decisions with Power BI dashboards for your SAP data

About Kagool:

We empower large enterprises to make decisions driven by data. Build a foundational platform for accurate, reliable data, and feed this into interactive analytics that are easy to access and update as often as you need.

What we offer

Build a culture of data driven decision-making with accessible, interactive analytics.

Kagool's product Velocity automates the ingestion of data into the Azure Data Lake from multiple sources, including SAP, Oracle, and Salesforce. Once there, the data can serve customisable, interactive Power BI dashboards, making it easy to find the insights you need.

As data experts, Kagool takes the time to understand your IT architecture and build a reusable future-proof data platform in Azure. No matter how large or complex your IT landscape is, Kagool can help.

Start making consistent, effective and accountable decisions across your organisation now.

What our customers are saying

"Kagool helped with the SAP ingestion and fully understood Azure. They pitched ideas, designed, and executed rapidly.

By moving to Azure and Power BI, we're getting better accuracy in our data."

– Minesh Bhudia, Senior Enterprise and Security Architect, Smiths Group

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
