What is Dyakon?

Dyakon is a cryptocurrency that was developed specifically for use in the Dyakon ecosystem. Dyakon token holders will be able to access all features of our network, including the ecommerce marketplace, where they will be able to purchase products and services.The next year, we'll likewise create our own exchange. People can join our exchange, deposit Dyacon and Tokens A and B, and receive fresh COIN issued by our own blockchain.
They can only purchase this new coin on our exchange unless they have Dyacon, Coin A, and Coin B. After a few months, we'll add additional cryptocurrencies and make it possible to purchase any cryptocurrency from our platform.

Before launching our wallet, marketplace, and exchange, we will work on our supplement tokens, coin A and coin B, about which further information will be supplied as soon as it is ready. In this case, You must own or have purchased Dyacon tokens to obtain access to Token A and B; if you do not own Dyacon, you must wait a month for them to be released on exchanges. People in our ecosystem will be able to enjoy, grow, earn, retain their currencies in our wallets, swap coins, and pay with Dyacon Coin A Coin B and the new COIN.
