New Activity

Activity Priorities and Description

Program Key Priority Area *

Mental Health Priority Area 2: Child and youth mental health services

Other Program Key Priority Area Description

Aim of Activity *

Enhance the quality of service, improve access to services and support headspace services by boosting physical capacity and accessibility, and appropriately accommodating current and future staffing needs at headspace sites identified as highest need.

Description of Activity *

New 2024/2025 funding has been provided to support enhancements to the Frankston and Narre Warren headspace sites to improve access to and experience of services provided to young people.

The funding will be used by the two sites to undertake the following:

- headspace Frankston funding will be used to undertake a fit out to include upgrades and streamline all workstations. IT

equipment updates and headsets for increased need for phone-based work and purchase furniture and equipment.

- headspace Narre Warren funding will be used to undertake refurbishments associated with building additional rooms related to General Practitioners (GPs) meeting with young people and Intake and Brief Intervention teams, other building works related to increasing storage, reception, painting carpet, Service Room reconfiguration, vinyl installation, acoustics and electrical as well as purchasing furniture.

This funding will not be used to fund activities including establishing a new service, purchasing land or buildings, rental costs and subsidising general ongoing administration of an organisation such as electricity and phone.

Additional information regarding services approach and consultations undertaken, commissioned services providers or communities, specific service delivery models/formats (eg group activities, individual support, face to face) and a description of the impact on the ground including what the activity means in a practical sense and anticipated outcomes and targets can be provided on request.

Earlier funding has been utilised in 2024/2025 as follows.

The funding for the Pakenham headspace was utilised to allow it to co-locate at a new multidiscipline purpose council building. The relocation has been delayed due to council contractor issues. Relocation is expected to be completed by 30 June 2026.

headspace sites which were previously approved for Capital Improvement and their status are:

- Narre Warren –various building works on track to be completed by 30 June 2025
- Dandenong – successful relocation during 2024/2025 to a larger site
- Frankston –minor infrastructure updates completed during 2024/2025
- Elsternwick/Bentleigh –this site is undergoing significant renovation which is expected to be completed by 30 June 2025.

SEMPHN Strategy 2023-2038: Path to Impact

Pillar 2: Consumer-focused healthcare

Pillar 3: Vibrant primary health services

Pillar 5: Innovation and system reform

Activity Consultation and Collaboration

Consultation

SEMPHN collaborates and consults with key stakeholders (headspace National and listed headspace centres) as an ongoing function.

Ongoing communications occur between headspace National and SEMPHN regarding the rollout of activities and to ensure there is no duplication of new activities with existing headspace programs and services and to ensure fidelity with headspace model and alignment with headspace facilities guidelines.

Collaboration

Ongoing communications will be conducted between the listed headspace centres and SEMPHN to monitor program delivery.

Existing, Modified or New Activity *

New Activity

Activity Priorities and Description

Program Key Priority Area *

Mental Health Priority Area 2: Child and youth mental health services

Other Program Key Priority Area Description

Aim of Activity *

Address demand and wait list management at headspace services identified as highest need.

Description of Activity *

Additional funding will be utilised by three headspace sites to improve wait times in ways specific to each site.

headspace Malvern: introducing the Treat First model including recruiting, employing and training Peer Workers to support the model, improving the support provided by young people under the Treat First model, and assessing the success of the model through monitoring and reporting.

headspace Frankston: build first contact and triage capability, and expand the support for early career graduates and junior staff through:

- recruiting, employing and training a Senior Practitioner and a Senior Clinical Supervisor/Educator to expand the mentoring of early career graduates
- utilise a clinical practice buddy system to minimise the impact of ebbs and flows in case load through rotational cycles
- provide clinical governance support and increase capability to enhance the support and clinical skill development of junior staff
- implement a new senior duty worker function to facilitate daily operational oversight for junior staff, for secondary consultation, in session support, triage walk in or crisis presentations and external stakeholder engagement.

headspace Bentleigh/Elsternwick: continue employment of a Practice Lead, Grade 2 Clinician, Administrative Support and Art Therapist to support the Session-by-Session (S-by-S) program to:

- expand the S-by-S program by expanding the number of S-by-S appointments at both Elsternwick and Bentleigh sites
- increase support for parents, provide more after-hours appointments and running Tuning into Teens workshops for parents
- run Acceptance and Commitment therapy for 12-16 year old young people.

Additional information regarding services approach and consultations undertaken, commissioned services providers or communities, specific service delivery models/formats (eg group activities, individual support, face to face) and a description of the impact on the ground including what the activity means in a practical sense and anticipated outcomes and targets can be provided when program design has been undertaken.

Previously provided funding was utilised during 2024/2025 by the Elsternwick/Bentleigh headspace site to employ a clinical team to provide interventions to young people and their families building on headspace’s S-by-S model. This will reduce demand on Access as it will provide a service which will be offered within a timely and youth friendly environment.

BCC-1 2025 headspace Building Cultural Capacity

Existing, Modified or New Activity *

New Activity

Activity Priorities and Description

Program Key Priority Area *

Mental Health Priority Area 2: Child and youth mental health services

Other Program Key Priority Area Description

Aim of Activity *

Build the cultural capacity of headspace services with a view to improving access and providing better support for young people from priority groups including but not limited to Aboriginal and Torres Strait Islander, LGBTIQ+ and Culturally and Linguistically Diverse (CALD) peoples.

Description of Activity *

New funding will be used by two headspace sites to undertake the following:

- headspace Frankston: the headspace site will recruit ,employ and train a multidisciplinary team to support the work of General Practitioners which will include an allied health clinician or mental health nurse (with LGBTIQ+ lived experience), a family peer worker and sexual health nurse. The headspace site will also provide training to staff working with LGBTIQ+ young people.
- headspace Dandenong: improve access for young people and their families from CALD communities by employing identified positions that will assist in reducing barriers to early help seeking and reducing the stigma associated with mental health. A culturally responsible practice advisor, multicultural mental health clinician and multicultural family peer worker will be recruited, employed and trained by the headspace site.

Additional information regarding services approach and consultations undertaken, commissioned services providers or communities, specific service delivery models/formats (eg group activities, individual support, face to face) and a description of the impact on the ground including what the activity means in a practical sense and anticipated outcomes and targets can be

provided when program design has been undertaken.
