

The doctors and team members of Murrells Inlet Veterinary Hospital and Harborwalk Veterinary Hospital are committed to providing the highest quality veterinary care.

We pride ourselves on how frequently our clients exclaim how they wish that they could have their medical needs taken care of here with us!

Surgical Care Packages

In order to provide your pet with the safest and most comfortable surgical experience possible, we not only rely on our skilled surgeons performing the best surgical techniques, but we also have the best surgical and monitoring equipment and we utilize the latest and safest products and technology available in veterinary medicine.

Our doctors believe in implementing pain management protocols as an integral part of every surgical procedure. Our highly trained and caring team of veterinary technicians and assistants will be assisting our surgeons and will be with your pet every step of the way to ensure their well-being. Our patients are monitored at all times during their stay with us. We have a dedicated ICU technician that assists the surgical team in monitoring patients as they recover from surgery.

For your pet's safety and comfort, we have developed Surgical Care Packages for elective surgeries such as spays, neuters, declaws and dental cleanings. The packages detail the services we recommend for our patients undergoing elective surgical procedures. The accompanying handouts detail the Surgical Care Packages, the details regarding the specific surgical procedures and why we recommend the medical procedures that are included in each Surgical Care Package.

Surgical Care Package #1 includes everything that we can do to ensure your pet's safety and comfort during their surgery at MIVH. Each package thereafter has one less service, thus decreasing the fee for the package. The final package is our "minimum standard of care". This is a term that refers to the level of medicine that is performed at our hospital. We believe that practicing medicine below that minimum standard is unacceptable and that your pet deserves at least that level of care. We believe in providing the best care available in veterinary medicine and cannot compromise on quality of care for your pet.
