

Qube Cloud

A powerful single-platform solution to help grow your business. Access key metrics at the click of a button to track your sales, stock and staff performance. Make better, faster business decisions with near real-time data, wherever you are.

This is reporting and management that you'll love.

Discover new insights into your business with near real-time updates, anytime, anywhere.

Remote POS programming and management at your fingertips

Features at a glance

Hosted solution

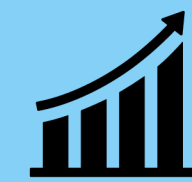

Access anywhere

No set-up fee

Sales reporting

Profit margin analysis

Staff performance tracking

Time & attendance monitoring

Recipe level stock

With Qube Cloud, managing your EPOS no longer means being stood in front of the terminal. Our enhanced cloud platform now offers remote POS programming and maintenance, giving you full control of your system away from the POS. Qube Cloud allows you to make changes in your own time.

You can remotely update product prices, add or remove items, manage staff, build mix and match promotions and meal deals, and design keyboard layouts - all from a single cloud-based platform.

Once you're ready, changes can be sent to the Uniwell POS when it's convenient for you to receive them, keeping control firmly in your hands.

TESTIMONIAL

Built for success

"Friendly, fast and efficient, 100% for service. The team and their EPOS have been a great addition to our busy business. The cloud software for working on the go has been a revelation. No hesitation to recommend Qube Cloud."

Sergio's

Ronnie Davison
Business Consultant & Buyer
