

Ike Skeleton Training Site

Jefferson City, Missouri | 16'W x 14'H x 48'L Drive-Thru Blast Booth

PROJECT OVERVIEW

VES was contracted to provide a drive-thru style blast booth system for the Ike Skeleton Training Site in Jefferson City, Missouri. The system was designed to support paint stripping operations for armored vehicles while providing reliable media recovery, dust collection, operator protection, and facility safety features.

The booth included a full-floor media recovery system engineered to support heavy vehicle loads, along with VES blast equipment, dust collection, HEPA filtration, and a personnel air shower to support safer surface preparation operations.

SYSTEM HIGHLIGHTS

- 16'W x 14'H x 48'L drive-thru style blast booth
- VET-II two-operator blast system w/ 4-cartridge media recovery dust collector
- 24-cartridge dust collector
- Full-floor media recovery system engineered to support 2,000 PSF
- Drive-thru booth configuration for improved workflow
- Integrated HEPA filtration for enhanced air quality control
- Air shower for personnel safety
- Heavy duty system designed for armored vehicle paint stripping & high demand military surface preparation environments
