

Veteran Abatement Services

Protecting People. Protecting the Planet. Delivering Results.

VAS doesn't just contain Hexavalent Chromium. We convert Cr(VI) into non-hazardous Cr(III), delivering safer environments and long term compliance.

TRUE INNOVATION IN HEXCHROME ABATEMENT

Unlike conventional systems that only trap contaminants, VAS technology neutralizes the danger at its source.

Our proprietary process converts Hexavalent Chromium (Cr6+) into non-hazardous Trivalent Chromium (Cr3+), eliminating risk rather than managing it.

THE RESULT :

- ✓ Reduced hazardous waste
- ✓ Lower disposal costs
- ✓ Long-term compliance confidence
- ✓ Safer environments for personnel and operations

COMPREHENSIVE TURNKEY SOLUTIONS

Every VAS engagement is designed for seamless implementation and long-term success:

-  **Field Deployment & Service**
Rapid setup and execution across any facility or environment
-  **Starter Product Package**
Everything needed to initiate immediate abatement
-  **Operator Training & Sustainment Support**
Hands-on training to ensure safe and effective long-term use
-  **Regulatory & Safety Compliance Guidance**
Designed to meet or exceed EPA and OSHA standards

INDUSTRIES WE SERVE

VAS services are trusted across a wide range of industries:

- Aircraft Corrosion Control Facilities
(Specialty)
- Mining Operations
- Oil & Gas Operations
- Marine & Shipyard Applications
- Paper & Pulp Facilities
- General Industrial Environments

No project is too large or too small

From single-unit operations to enterprise-wide programs

WHY CHOOSE VAS

- ✓ **Proven Military & Commercial Expertise**
Built on decades of corrosion control experience
- ✓ **True Hazard Elimination**
Converts contaminants instead of containing them
- ✓ **Scalable Solutions**
From localized needs to global development
- ✓ **Safety-Driven Performance**
Protecting your people, operations, and reputation

READY TO ELIMINATE HEX CHROME RISKS AT THE SOURCE?

Join the growing number of organizations choosing VAS for safer, cleaners, and more effective abatement.
