Thank you for purchasing the RI high-capacity loader!

Please scan QR code
for instruction videos

The RI Loader is the fastest and highest capacity speed loader on the market. Our patent pending design provides rapid loading and automated locking in a single push motion. The RI Loader holds up to 3 reloads in a single device. Our speedloader is a “must have” for defense, competition, and range shooting.

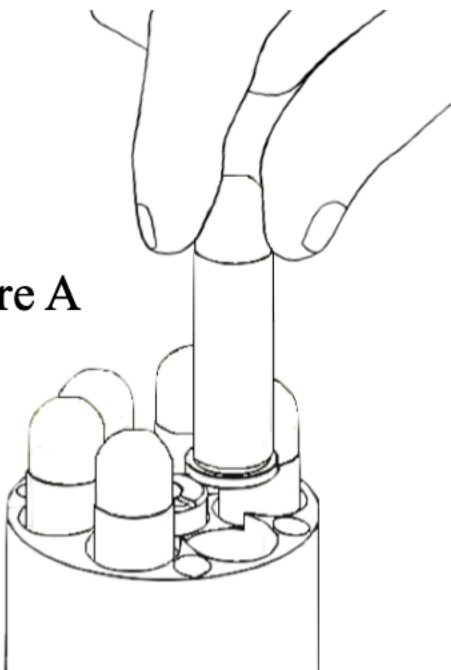

Patent Pending

Assembled in USA

Instructions For Loading RI High-Capacity Loader

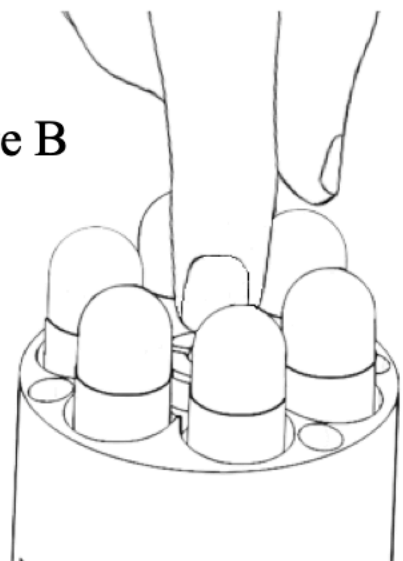

***** Read All Instructions Before Loading and Use *****

Figure A

Step 1 (Figure A) – Rest bullets in each cylinder with projectile side facing upwards. **Note:** Do not force bullets past resting point as damage may occur.

Figure B

Step 2 (Figure B) – Firmly press down the center button until the bullets drop into the speedloader.

Instructions For Loading Revolver

Step 1 (Figure C) – Point revolver barrel straight downwards with cylinder open.

Step 2 – Align RI Loader vertically and guide bullets into cylinders until RI Loader's button touches cylinder ratchet.

Step 3 – Press down on RI Loader, firmly and quickly.

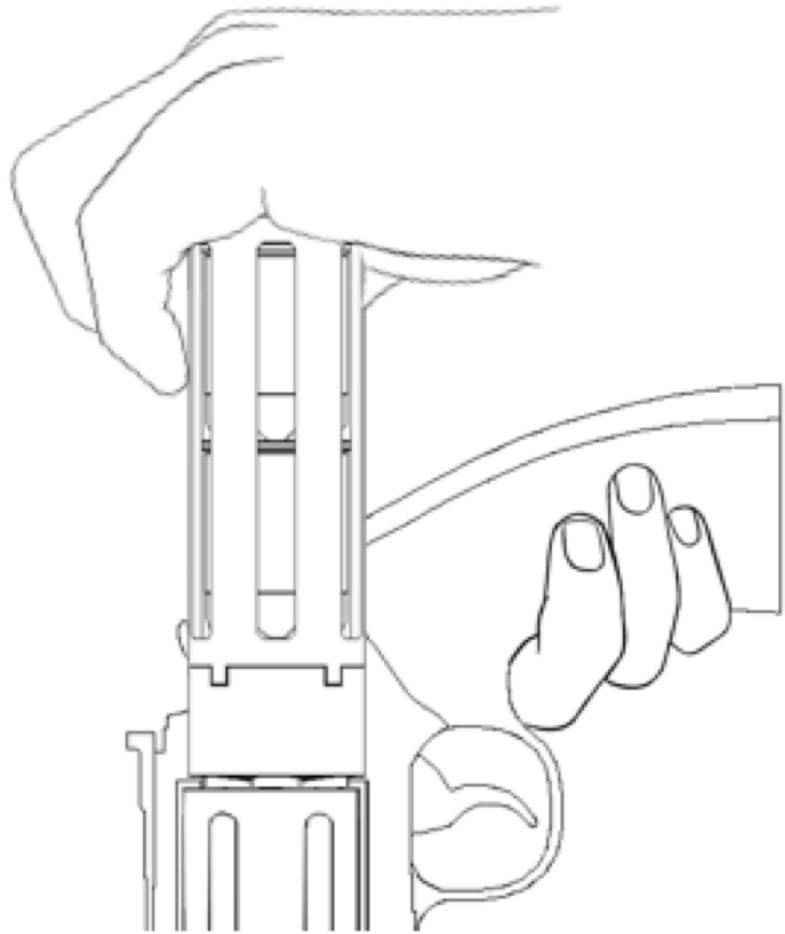

Figure C

Caution: For use with Flat Point, Hollow Point, Round Nose Flat Point, Soft Point, and Wadcutter projectiles only. Inspect bullets to ensure primers are recessed into casing. Not for use with (Full metal Jacket) and pointed projectiles, as projectile's tip may come into contact with adjacent bullet's primer – causing dangerous discharge.

Customer Service / Warranty: The RI High-Capacity Loader comes with a 1-year warranty. RevIndustries stands by our product. We will replace our speedloader, for any reason, at no charge*. For detailed warranty and service information, please visit www.RevIndustries.com
