

CARBINE PADLOCKS

Carbine is the next generation in locking. Carbine is a high-end brand of locking & hardware that is chosen by locksmiths and installers. Until Carbine, developments in mechanical locking systems had been few and far between. Even when a way was found of improving a current series of locks, there was little desire on the part of the manufacturers to change what 'always has been the way. Carbine pushes the boundaries and looks to solve the problems that

have dogged the industry for years. The Carbine Padlocks are a next generation product. Here's why: Carbine padlocks feature a unique patented cam design allowing the user to change padlock function in seconds. The padlocks have been designed by locksmiths using fewer parts and with a smoother action. Carbine products feature innovative designs and modular functionality so you get a product that solves problems.

BRASS PADLOCKS

The Carbine series of padlocks are a high quality modular brass padlock. Only the highest quality materials are used in the construction of these locks. Carbine padlocks are workshop and field tested for security, strength and weather resistance. This range features a unique patented reversible cam swap functions. Features include:
