PARTITION INDICATOR BOLTS

The HFH series of indicator bolts include many different options presented by different doors in a variety of partitions. The 200 series are surface mounted with an emergency slot release or turn button safety release handle from the outside, rather than the usual slot release and a display pack option for retail purposes. Features include:

- Two options to choose from, either the 200 or 200A series
- 200 model has a has an offset T style turn with visible fixing and a slot release mechanism form the outside
- Maximum door thickness is 35mm
- Spindle length is 50mm
- There is also a display pack version for retail purposes RPI-1
- 200A model has the same offset T style turn with visible fixing and a turn button safety release handle from the outside, rather than the usual slot release
- Both models are supported with an internal turn, "vacant" or "engaged" external indicator and a staple to house the indicator bolt
- Measures 63mm x 40mm
- Made of die cast zinc construction
- Available in a satin chrome finish
