HEAT FROM THE HEART

MISSION STATEMENT

At Thompson Mechanical, we believe no family should have to go without heat. Heat from the Heart is our community outreach program, created to provide furnace repair and replacement assistance to individuals and families in our community who are facing financial hardship and cannot afford these essential services on their own.

Every winter, hardworking neighbors are forced to choose between heating their homes and covering other basic necessities. Through Heat from the Heart, we work to identify those in greatest need — elderly residents on fixed incomes, families recovering from job loss or medical crises, and individuals who have fallen on hard times through no fault of their own — and provide them with safe, reliable heat at little or no cost.

Heat from the Heart is powered by the generosity of our team, our customers, and our community partners. Every furnace we install, every repair we make, and every family we help reflects our belief that warmth is not a luxury — it is a necessity, and it is our responsibility to help our neighbors have it.

This is who we are.

This is Heat from the Heart.
