To Whom it May Concern,

I am writing in strong support of the FY26 EPA Brownfields Grant application for the former waste transfer station at 1004 Stewart Street. As someone who lives near and has longstanding ties to the Paris Westside Neighborhood, I have seen firsthand how this site has affected our community for many years.

The relocation of the waste transfer facility was a major step forward, and completing the cleanup is essential for restoring the health, safety, and dignity of the neighborhood. For many years, families on the Westside lived with truck traffic, odors, and environmental impacts that no residential community should have to endure. Cleaning up the site will remove long-standing contaminants and eliminate ongoing risks to the people who live, work, attend church, and raise children in the area.

Redeveloping the property honors the history of the neighborhood while giving residents back a valuable community space that was lost for generations. I fully support Bourbon County's effort to secure the resources needed to clean up the site and return it to the community.

Thank you for considering this important project and for your commitment to improving the quality of life in the Westside Neighborhood.

Sincerely,

---
