

STI Care in Brazil: A Quick Guide for English Speakers

Navigating Brazil's healthcare system for STIs is challenging due to language barriers, the requirement for a Brazilian ID (CPF) at most clinics, and the high cost of private lab tests. My Brazilian Doctor offers a streamlined telemedicine solution specifically for English speakers, providing immediate prescriptions and guidance valid nationwide.

IMMEDIATE PREVENTION AND TREATMENT

THE 72-HOUR WINDOW FOR DOXYPEP

Take Doxycycline 200mg or Azithromycin 1000mg within 72 hours of exposure to prevent infections.

IMMEDIATE SYNDROMIC MANAGEMENT

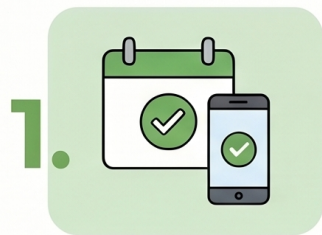

Start treatment based on symptoms immediately without waiting 4-5 days for laboratory results.

NATIONWIDE DIGITAL PRESCRIPTIONS

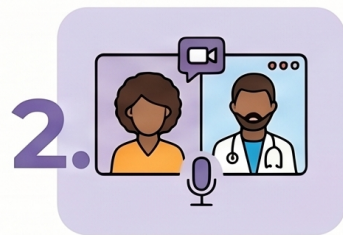

Receive a legally valid digital script with a QR code accepted at any Brazilian pharmacy.

HOW THE TELEMEDICINE PROCESS WORKS

1. SIMPLE VIRTUAL BOOKING

Schedule same-day English consultations online without needing a local Brazilian ID (CPF).

2. PERSONALIZED VIDEO CONSULTATION

Discuss symptoms and history with a licensed doctor via a secure Zoom or audio link.

3. TESTING AND FOLLOW-UP

Receive digital lab requests for specific STI panels and a free follow-up to review results.

COMPARISON: TRADITIONAL PATH VS. MY BRAZILIAN DOCTOR

| TRADITIONAL PATH | vs. | MY BRAZILIAN DOCTOR |
|-------------------------|--------------|----------------------|
| Portuguese Only | Language | 100% English |
| Requires local ID (CPF) | Documents | No local ID required |
| Paper (Hard to get) | Prescription | Digital |
