

Carbon Reduction Plan

Supplier name: ...Altiatech Ltd.....

Publication date:01/05/2025.....

Commitment to achieving Net Zero

Altiatech Ltd is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2025

Additional Details relating to the Baseline Emissions calculations.

This is Altiatech Ltd's first carbon footprint assessment. As a service-based IT consultancy with a minimal physical footprint, our direct emissions are very limited. We operate primarily through a serviced office spaces which are used by staff members for a few days per week, with most of our work being delivered remotely via cloud environments or at client sites. For Scope 2 emissions, we have estimated our portion of electricity usage within our serviced office based on our limited occupancy, small floor space, and typical IT equipment usage. The vast majority of our emissions fall under Scope 3, particularly from business travel to client sites and the carbon footprint of our cloud computing usage. We are working to expand our emissions reporting to include more comprehensive Scope 3 emissions in future reports.

Baseline year emissions:

EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	0.0
Scope 2	0.0
Scope 3 (Included Sources)	0.129 - Business travel road 0.057 - Business travel train 0.770 - Hotel Stays 10.426 - Employee Commute
Total Emissions	11.382

Current Emissions Reporting

Reporting Year: 2025	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	0.0
Scope 2	0.0
Scope 3 (Included Sources)	0.129 - Business travel road 0.057 - Business travel train 0.770 - Hotel Stays 10.426 - Employee Commute
Total Emissions	11.382

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to **7.967 tCO₂e** by **2030**. This is a reduction of **30%**

We have set the following interim targets:

- 20% reduction by 2027
- 30% reduction by 2030
- 60% reduction by 2040
- Net Zero by 2050

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been implemented since establishing our baseline. These measures will be in effect when performing the contract:

- Implementation of a company-wide remote working policy where possible, reducing employee commuting and office energy consumption
- Selection of serviced office providers with strong environmental credentials and energy efficiency measures
- Implementation of power-saving settings on all company devices
- Promotion of public transport for necessary business travel
- Adoption of video conferencing as the default option for meetings, reducing travel emissions
- Conscientious use of cloud resources, optimising usage to minimise unnecessary processing and storage

Future carbon reduction initiatives

In the future we hope to implement further measures such as:

- Obtaining ISO 14001 certification by 2026
- Working with our serviced office providers to transition to 100% renewable electricity by 2027
- Evaluating cloud service providers based on their environmental credentials and renewable energy commitments
- Developing a comprehensive Scope 3 emissions inventory including all purchased goods and services
- Implementing a zero-waste policy across all operations by 2028
- Establishing a green team to identify and implement further emissions reduction opportunities
- Prioritising low-carbon transportation options for all business travel
- Setting science-based targets aligned with the Science Based Targets initiative (SBTi)

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standards for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in

¹ <https://ghgprotocol.org/corporate-standard>

² <https://www.gov.uk/government/collections/government-conversion-factors-for-company-reporting>

accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:
