TRAUMATIC INCIDENT RESPONSE PROTOCOL

About Us

The Traumatic Incident Response Protocol (TIRP) provides timely and coordinated support to York Region communities impacted by violent and traumatic events.

Our focus is on responding to traumatic incidents across 4 areas: Northern Georgina, Central Newmarket, South-Central Richmond Hill/Vaughan, and South-Central Markham.

Our Mission

TIRP aims to bring communities together after a traumatic event to restore safety, provide support, and foster a stronger, more resilient environment for all.

As part of York Region's **Community Safety and Well-Being Plan**, TIRP works to reduce distress, promote healing, and enhance community safety.

Connect With Us!

Why TIRP?

TIRP strengthens and complements the work that is being done by community organizations. Severe and unexpected traumatic incidents can overwhelm local organizations and often fall outside their scope of work. TIRP aims to bridge this gap by mobilizing a coordinated community response, ensuring that no one has to face these challenges alone.

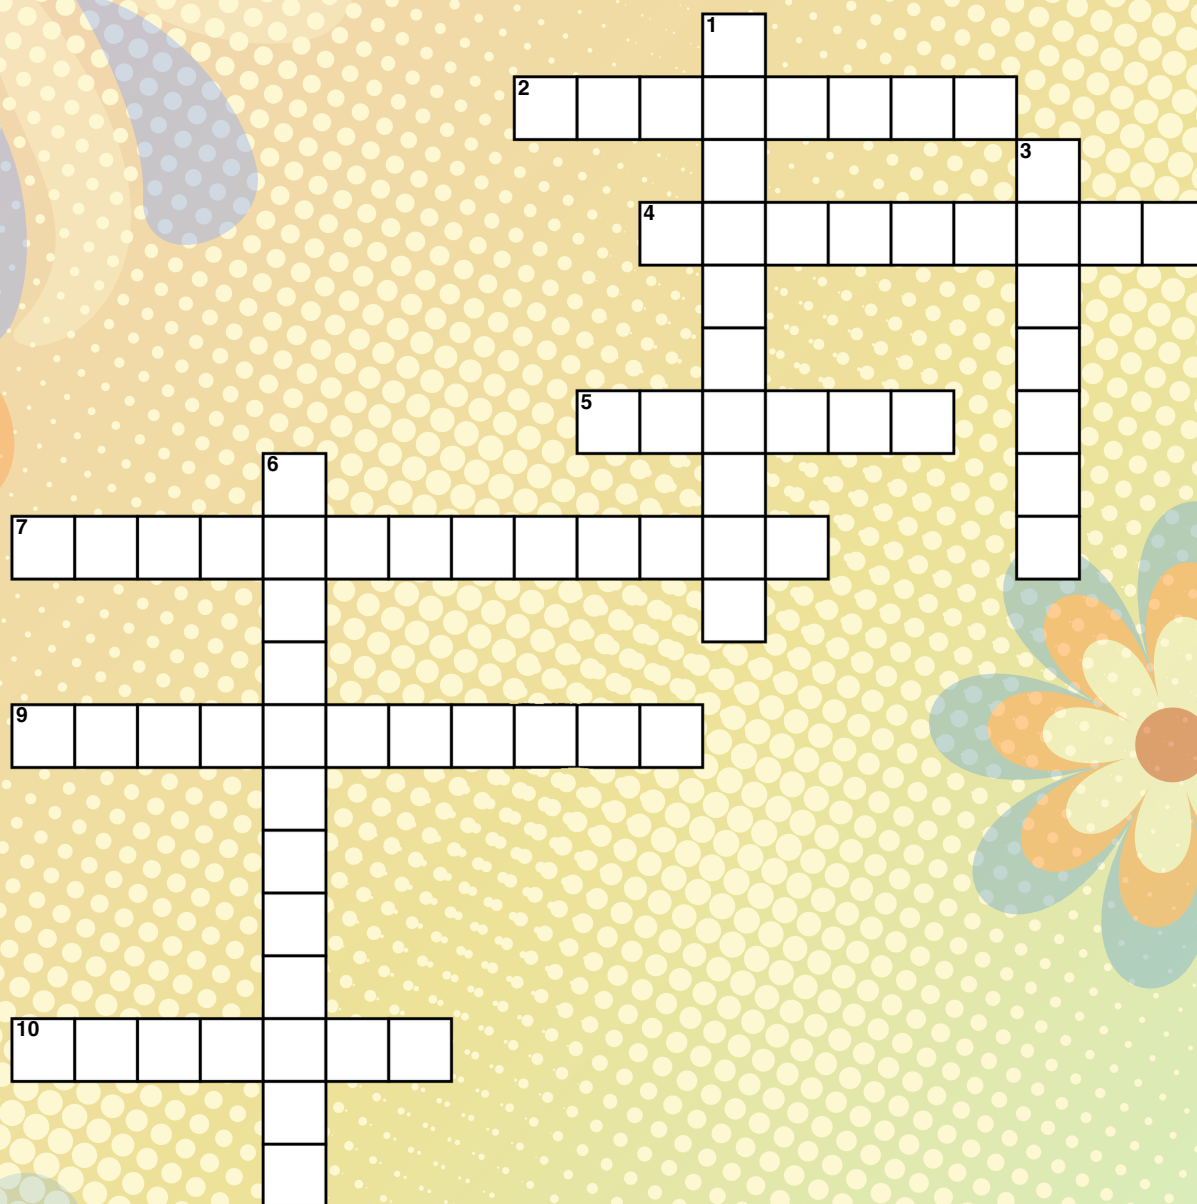

This approach not only addresses the immediate aftermath but also supports the **Community Action Tables (CAT)** and their ongoing efforts to promote long-term wellness, mental health, and safety across York Region.

Scan the QR code to:

- Learn about York Region's CSWB Plan and its initiatives
 - Contact your TIRP Coordinator for information and support
 - Participate in community safety surveys to share your input

SUDOKU EASY/MEDIUM

Instructions

The rules for Sudoku are simple, but they take some time to master.

A 9x9 square must be filled with numbers from 1-9 with no repeated numbers in each line, horizontally or vertically.

To challenge you more, there are 3x3 squares marked out in the grid, and each of these squares cannot have any repeated numbers either.

More tips on the next page!

SUDOKU DIFFICULT

Sudoku can be hard at first!
learn some tips and tricks to get
you started and to help you out!

Tips & Tricks

1. Look for easy solutions.

Many puzzles will leave one or two blanks either in a line or in a box. A line might be missing a 5 and a 6, but a box along that line will already have a 6 in it, so you know this blank must be a 5, and the other blank must be a 6. The same may be the case for one or two missing numbers in the smaller boxes. Filling these blanks will get you on your way to a solution.

2. Seek the missing numbers.

As you fill in the easy solutions, you may start to find other missing numbers that are easy to place. In the above example, the box now has a 5, and that may help you solve the rest of the 3x3 area, or the lines that cross the area.
