UNDERSTANDING GHK-CU

What It Is and How It Works

WHAT IS GHK-CU?

GHK-CU is a naturally occurring peptide that diminishes with age. It plays a vital role in stimulating collagen production and repairing tissues throughout the body, making it key for skin and hair rejuvenation.

HOW IT WORKS?

GHK-CU functions by signaling the body to produce more collagen and elastin, which are **essential for firm, youthful skin**. It also acts as a powerful antioxidant and anti-inflammatory agent, protecting cells from damage.

THE SCIENCE BEHIND IT

GHK-CU stimulates remodeling of the skin's extracellular matrix. **It upregulates tissue repair genes and acts as a potent copper-binding peptide**, facilitating enzymatic reactions crucial for healing and regeneration.

PEPTIDE SKIN REGERNATION

It plays a vital role in stimulating collagen production and repairing tissues throughout the body, making it key for skin and hair rejuvenation. **It is a copper peptide that works by binding to copper ions, a mineral essential for healthy skin, hair, and connective tissues.**

BENEFITS OF GHK-CU

Skin Rejuvenation:

Reduces wrinkles and fine lines, improving skin elasticity and firmness.

Wound Healing:

Accelerates repair of skin and other tissues, reducing scar formation.

Hair Growth and Thickness:

Stimulates hair follicles for fuller, healthier-looking hair.

Anti-Inflammatory Action:

Calms irritated skin and protects cells from oxidative damage.

Antioxidant Protection:

Guards against cellular aging by neutralizing harmful free radicals.

TREATMENT SUGGESTIONS

DOSAGE INSTRUCTIONS

Starting Dose

Begin with a starting dose, injected subcutaneously once weekly, as prescribed by your healthcare provider.

Adjusting the Dose

After a few weeks, your healthcare provider may increase the dose per week based on your response.

Maximum Dose

The dose can be gradually increased, with a maximum dose determined by your healthcare provider.

Injectations are typically self-administered with a small, easy-to-use syringe. This seamless process is safe and healthcare provider-suggested.
