IMS Chat

Making Team Communication Seamless and Care Coordination Easy

A secure, HIPAA-compliant messaging system,
IMS Chat lets you share actionable, real-time information
with your team at the point of care.

File Sharing
Instantly send patient information, documents, images, and files to your staff members.

Information Tagging
Find drug and ICD information within your IMS database and share them with a click.

Secure Platform
Ensure that all your confidential messages are kept safe and secure within the IMS system.

Experience a convenient way to communicate and coordinate with your care teams with **IMS Chat.**

Say Hello to an Efficient, Reliable Messaging Platform

While fully integrated with the IMS system, IMS Chat is an independent desktop application that you can download and install onto your PC or Mac computer. Maximize teamwork and improve care coordination with fluid, unimpeded communication flow.

Instant Messaging Without Limit

Communicate with your team as much as you need, whenever you need to.

Next-Level Integration

Instantly use IMS Chat without the need to be logged in to your IMS.

Coordinate With Ease

Efficiently message more than one member of your staff with the group chat feature.

Hassle-Free Authentication

Quickly log in to IMS Chat using only your IMS credentials.

Don't Let Team Communication Just Be a Footnote in Your Practice. Keep Your Team on the Same Page With IMS Chat.
