
TULI ARMCHAIR

# **TULI** ARMCHAIR

Tuli seems to emerge from a single line that has taken on volume. Its structure curves, wraps around, and turns back on itself, creating an almost continuous form with no angles to interrupt the visual flow. Its contours are precise, yet its appearance is deliberately soft, allowing the construction to recede so that only the form remains.

Proportion is essential to this design. The backrest opens outward like a shell, while the seat nestles within it, creating an intimate relationship between enclosure and freedom. The seams follow the curves without competing with them. Everything seems resolved through geometry itself—even what would normally remain hidden.

Tuli swivels. And that movement changes its relationship with its surroundings. From one angle, it presents itself as a sculptural piece; from another, it reveals the space around it. The swivel motion is more than a functional feature: it allows the armchair to respond to the architecture, follow the conversation, and face different directions without losing its identity.

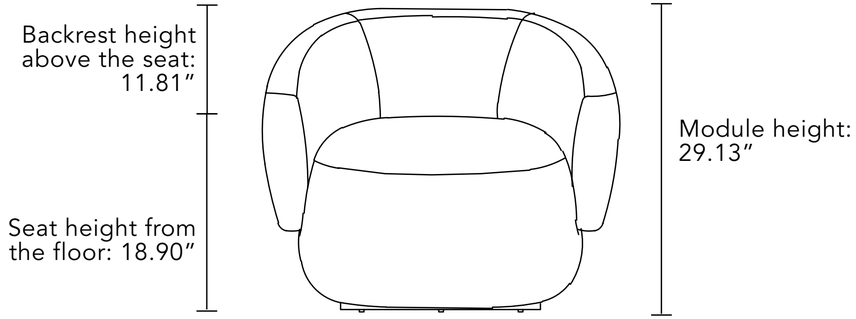

There is a certain intelligence in making such an enveloping piece appear so simple. Tuli does not seek to dominate a room, but creates a small territory within it—a place defined by curves, proportion, and comfort, where design becomes more than what we see and begins to shape the way we settle in.

## TECHNICAL INFORMATION

**Frame Material:**
Certified plantation-grown wood (Eucalyptus grandis and multi-ply plywood panels), kiln-dried with controlled moisture content.

**Frame Assembly:**
Wood joints are secured with corrosion-resistant staples and a special adhesive to keep the frame sturdy and durable.

**Foam:**
Foams certified in accordance with ISO 9001 and manufactured without CFCs.

**Comfort System:**
Foam cushioning.

**Seat:**
Fixed — Hiper Flex foam [density: 1.81 lb/ft³], Soft foam [density: 2.18 lb/ft³], D20 Soft foam, and polyester fiber batting (4.23 oz).

**Backrest:**
Fixed — Hiper Flex foam [density: 1.81 lb/ft³], Soft foam [density: 2.18 lb/ft³], and polyester fiber batting (4.23 oz).

**Base:**
Carbon steel swivel base.

**Removable Parts:**
Cannot be disassembled.
