

Bannerstone Metrics (established by A. Blume, 2017)

These metrics were established to further standardize the quantitative information we can gather regarding bannerstones.

1. BA#¹:
2. Collection:
3. Catalog or Accession #:
4. Date Studied:
5. Bannerstone Type²:
6. Material³:
7. Perforation (Perforated, Partially-Perforated, Non-Perforated):
8. Condition (Whole, Broken, Fragment, Preform):
9. Find (Archaeological, Non-Archaeological):
10. Provenance/Provenience:
11. Location (Cache, Burial, Midden, Other):
12. Color:
13. Width (cm):
14. Height (cm):
15. Diameter of Perforation (cm):
16. Depth at Perforation/or Widest Point (cm):
17. Depth at Edge (cm):
18. Weight (g):
19. Date⁴:
20. Notes:

¹ For bannerstones submitted to and included on the ABP site, unique BA#'s will be designated.

² For a list of bannerstone types please see the section on morphology on the ABP site.

² For a list of bannerstone types please see the section on morphology on the ABP site.

³ Please indicate igneous, metamorphic, sedimentary, or more specific identification if possible.

⁴ Bannerstones date from 6,000 BCE to 1,000 BCE within the Archaic period. If more specific dates are available to archeological context or radio carbon dating, please indicate.
