

Glucose

Intravenous Infusion 50% w/v

25 g in 50 ml

Glucose Intravenous Infusion 50% w/v is a sterile solution of glucose in water and is indicated for:

- restore blood glucose levels.
- provide temporary relief from the symptoms of a swollen brain and comas due to low blood sugar.
- correct high blood potassium levels

Glucose 50% is frequently used in both adults and children to restore blood glucose concentrations in the treatment of hypoglycaemia resulting from insulin excess or from other causes.
