

TGS Wellness Guidelines

Please carefully read through these guidelines and protocols before your rehearsal and production times. Thank you!

As a theater group, we value the health and wellbeing of our fellow actors and production crew. As such, we ask that anyone experiencing persistent coughing, sneezing, vomiting, or fever refrain from attending rehearsal until these symptoms subside.

Should anyone in this production test positive for COVID or flu, we ask that they refrain from attending rehearsal for at least 5 calendar days or until disease-spreading symptoms (coughing, sneezing) subside. Anyone with a fever or experiencing vomiting shall refrain from attending rehearsals until 24 hours after fever broke or 24 from the last instance of vomiting.

We will be wearing masks whenever necessary according to CDC and Town Guidelines. When there is a mask mandate, masks will be required for rehearsals. If there is no mask mandate, it is up to each individual to wear or not wear at their own comfort level without any judgement.

If you have any questions or concerns, do not hesitate to reach out to the production crew. We aim to keep everyone safe while making theater magic!
