

GUIDE BOOK
2025/2026 EDITION

“

Canada offered me everything I wanted in a school of higher education. The diversity I experienced, both in social and academic settings, has enriched my understanding of tolerance, acceptance of different cultural practices and my ability to communicate over differences. I have no doubt that the academic rigor at McGill has shaped me into a more organized and disciplined person. The basic civil engineering knowledge that I acquired at the university is the foundation I have used to build my own business.

Nyoto Irawan | McGill University, 1978 | PT. Duta Sarana Perkasa, President & CEO

”

“

Canada was relatively unknown to me when I decided to go there to further my studies. My goal was to acquire an excellent business education so that I could continue my family business in the food retail sector, Hero Supermarket. Hero supermarket is the first modern retail in Indonesia. Established in 1971, Hero has grown from one small supermarket to a chain of supermarkets, drug stores and hypermarkets across Indonesia.

When I returned from Canada, I set up the Lion's Gate Club with some Indonesian friends who had also studied in Canada. It was a social network of friends and alumni who wanted to maintain ties with Canada. Today, this club is called CALINDO-“Canadian Alumni in Indonesia”. Recently, I have been elected again as the president of Calindo and previously having the honour of serving as its president from 1997 – 1999 as well as being a member of its Boards of Governors.

Canada is a wonderful example of multicultural diversity and harmonious living. Having spent eight years of my life there, Canada has had a great influence on my life. My time there helps me to be a more well-rounded and accepting person; my experience in Canada definitely provides a strong foundation for which I build my professional and personal life

Ipung Kurnia | Simon Fraser University, 1986 | PT. Hero Supermarket Tbk, Chairman of the Supervisory Board

”

“

Canada is an excellent place to study and start a career in STEM, with universities offering world-class research opportunities. During my study, I was able to work on various paid research projects in fields such as education, biomedicine, and forestry. The school provides many opportunities, and as their motto says, "it's yours" to take advantage of.

I highly recommend joining the Co-op program, where you can spend several semesters working full-time, gaining valuable experience. This program made my transition into a career in the US and Canada much smoother, as I had already gained meaningful work experience in biotech research and tech development with multinational companies during my studies.

Canada's multicultural environment is also a significant benefit. Living and working with people from diverse backgrounds is an enriching experience that prepares you for success in today's globalized world. The diversity you encounter in Canada is truly remarkable and contributes to both personal and professional growth.

Marc Irawan | University of British Columbia, 2009 | CoLearn, Co-Founder & COO

”

“

To be a well-rounded designer, I know that I have to change how I view the world. My experiences in Canada have embedded in me the notion of perseverance, independence, and awareness (cultural and self). You will be surprised at your own progression - about how much you have learned, grown, and matured as a designer and individual; I know I am. If you can, go out, explore, and see the world. If you are stuck within a box and that is the only thing you ever see, then that is the only world that you will ever know. And that will automatically be reflective in your thinking (and design).

**Kenneth Anggara |
University of Manitoba, 2018 |
MOTIV Architect, Architect**

”

“

My experience of studying, working and living in Canada, especially in Toronto, has been nothing short of amazing. The aspect I cherish most is the incredible diversity where I've had the privilege of meeting people from every corner of the globe, forming a beautiful cultural mosaic experience. Each interaction has been an opportunity to listen to their unique stories, enriching my understanding and appreciation of the world.

Working as an intern here has been equally rewarding; I've been able to immerse myself in the dynamic business environment of Canada, contributing to the hustle and vibrancy that define it. This journey has not only broadened my professional skills but also deepened my personal growth, making my time in Canada an unforgettable chapter of my life.

**Sekar Rachmasari |
current student at University of Toronto |
Bachelor of Business Administration
Specialist Co-op program in Management
and Finance**

WELCOME MESSAGE

Dear Student,

I am pleased that you have considered Canada as the location to continue your studies abroad.

Canada is the right study destination that can improve your job opportunities and your quality of life. By choosing Canada, you will have access to an excellent education experience – one that is rooted in a culture of hands-on learning, smaller student-teacher ratios, as well as cutting-edge technology, research, and innovation.

Our prestigious education institutions from elementary and secondary schools, vocational and technical schools, colleges, institutes, and universities offer tremendous variety of programs in both the public and private school systems. Canada is also well known for its excellence in English and French as a Second Language learning programs.

Not only are the high quality of Canadian degrees, diplomas and certifications valued and recognized all over the world, you may also like to join the growing number of international students who are choosing to remain in Canada to pursue job opportunities under our three-year Post-Graduation Work Permit Program. The fact that many choose to stay in Canada, after their studies, reflects the positive experience international students have, both inside and outside of the classroom. All of these opportunities are provided in a learning environment that's of high quality, diverse, and one-of-a-kind. With the open work permits, international students will have the benefit of receiving Canadian work experience and the opportunity for skills development that will position them to be more competitive in the global market.

I invite you to contact the Embassy of Canada in Jakarta and the Canadian Education International to learn more about institutions in Canada and the wide range of programs offered, as well as the schedule of the regional education fairs.

I, therefore encourage you to choose Canada as your pre-eminent study destination and explore a place that is both naturally and culturally beautiful.

I wish you all the best with your studies!

9 REASON WHY STUDY in CANADA?

1

QUALIFICATIONS VALUED AROUND THE WORLD

Canada's high academic standards and rigorous quality controls mean that you'll be earning a high-quality education that will open doors for your future and benefit your career over the long term. Canadian credentials will open doors to your future and benefit your career.

2

AFFORDABLE AND FLEXIBLE EDUCATION

Cost of living and tuition fees for international students are generally lower in Canada than in other countries. Canadian education is also known for offering flexible transfer pathways between types and levels of education.

3

MULTICULTURAL SOCIETY IN A DIVERSE AND INCLUSIVE ENVIRONMENT

Canadians are known for being friendly, open and tolerant and our country welcomes students from more than 200 ethnic origins.

4

HEALTHY AND SAFE COMMUNITIES.

The United Nations consistently ranks Canada as one of the best places in the world to live. You'll enjoy all of the freedoms which protect Canadians: respect for human rights, equality, and a stable and peaceful society.

5

WORLD-CLASS LANGUAGE EDUCATION

Canada is a bilingual country and is considered a world leader in language training since teaching of French and English as a first and second languages is an integral part of a Canadian education.

6

EXCITING CAMPUS LIFESTYLE

From wired libraries and Olympic-quality sports facilities, to public concert halls and art galleries, Canada's post-secondary campuses offer you enormous possibilities to combine learning and leisure.

7

INNOVATIVE AND ABUNDANT RESEARCH OPPORTUNITIES

The education system in Canada is grounded in a culture of research and development with excellent research facilities supported by Canadian government and industry.

8

LAND OF POSSIBILITIES

Under Canada's highly dynamic and hands-on academic environment, you will not only acquire knowledge and skills in analysis and communication, but you will also learn how to express yourself, demonstrate your creativity, and develop your self-confidence!

9

POSSIBILITY OF IMMIGRATION

Some international students with Canadian credentials and Canadian work experience may apply for permanent residency without having to leave Canada.

For more information about the possibility of immigration to Canada once your schooling is complete, please visit www.canada.ca.

FAST FACTS about CANADA

Land Area	: 9,984,670 sq km (Canada is the 2nd largest country by area)	
Population	: Over 41 million people (Approximately 90% of Canadians live within 250 km of the US border)	
Capital City	: Ottawa, Ontario	
Provinces & Capital Cities	10 Provinces: Alberta (Edmonton) British Columbia (Victoria) Manitoba (Winnipeg) New Brunswick (Fredericton) Newfoundland & Labrador (St. John's) Nova Scotia (Halifax) Ontario (Toronto - Canada's largest city) Prince Edward Island (Charlottetown) Quebec (Quebec City) Saskatchewan (Regina) 3 Territories: Northwest Territories (Yellowknife) Nunavut (Iqaluit) Yukon (Whitehorse)	
Seasons	: Spring (March - May) : Summer (June - August) : Fall / Autumn (September - November) : Winter (December - February)	
Education	: Compulsory from 5-7 to 16-18 years of age	
Currency	: Canadian Dollar (C\$1 = IDR11,844 as of 6 October 2025)	
Living Expenses	: C\$20,000 - 25,000 / year	
Tuition Fees	: Language : Primary / Secondary : College : University	C\$340 - 435 / week C\$9,500 - 18,000 / year C\$8,000 - 22,000 / year C\$18,000 - 48,000 / year

Do you know that Canada offers the largest Co-op program in the world with Post Graduation Work Permit up to 3 years?

Canadian Currency and Banking

It is your choice whether to open a bank account in Canada. If you do, most major banks offer great student accounts and services that can help you save on international transaction charges. A basic bank account costs approximately \$5/month and most include personalized cheques that can be used to pay for large amounts like rent and bill payments. Internet banking is also quite common and has become a widely accepted method for bill payments and other transactions.

To find out more about student account options or to open an account, visit any Canadian bank or go to your current bank and inquire about partnerships they may have with those in Canada.

Canada's major banks are:

- Royal Bank of Canada
- Scotia Bank
- Canadian Imperial Bank of Commerce
- Bank of Montréal
- TD Canada Trust
- President's Choice Bank

Credit Cards

The majority of stores accept a variety of payment methods, including cash, debit cards and credit cards. Visa and MasterCard, the two main credit cards, are widely accepted by most major businesses, however American Express is not. Be sure to check with your bank before using your existing Visa or Mastercard in Canada and be aware of exchange rates and any other foreign transaction fees.

Health and Travel Insurance

In Canada, each province or territory is in charge of its own healthcare system covering Canadian citizens for hospital and physician care. Virtually all Canadian post-secondary institutions have medical insurance plans available for international students. Contact the Canadian educational institution you plan to attend for information about health insurance coverage for you.

Regardless of whether or not you plan to purchase coverage from a Canadian institution, it is highly recommended that you purchase travel health insurance. For more information on travel health insurance, contact your travel agent.

Climate

Canada's climate is characterized by its diversity, both from region to region and from season to season. While extreme northern temperatures climb above only 0°C for a few months every year, most Canadians live within 300 kilometres of the country's southern border, where warm springs, hot summers and pleasantly crisp autumns prevail for at least 7 months. Canada has 4 very distinct seasons: spring (March-May); summer (June-August); fall (September-November); and winter (December-February).

Accommodation On or Off Campus Residence / Dormitory

Dormitories are the preferred accommodation for most students in Canada. They are usually located on or near the university or college campus and typically have shared kitchen, bathroom and laundry facilities. Some dorm accommodations offer optional cafeteria meal plans where students pay a set up-front fee for the term and receive 2 or 3 meal tickets per day.

Dormitory is a great idea if:

- You're only going to be in Canada for a semester.
- You're new to Canada and would like to meet people quickly and easily.
- This is your 1st or 2nd year of study.
- You are living away from home for the first time.
- You want to be accessible to everything on campus without having to worry about transportation.

Private Accommodation

A listing of private accommodations (e.g., apartments, flats, room and board) close to campus is usually available through the housing office or student's union of most universities and colleges across Canada. Since schools don't regulate private housing, it is best to visit the location in person and make sure you ask any questions you might have before committing to a lease.

Electrical Appliances and Voltage

In Canada, appliances use 120 Volts with plug Type B. An electrical appliance plugged into an outlet supplying an incorrect voltage can cause an electrical fire, sparks and smoke. Some appliances come in multi-voltage models, meaning they can be adjusted to match the electric current in that region. If the voltage on an appliance cannot be changed, a device called a "transformer" can be purchased at any major electronics retailers to convert the appliance to the proper current.

Some things to consider before renting an apartment or flat:

- Prices, quality and availability vary greatly. Start apartment hunting early!
- Rental prices can range from C\$900 - 2,000 per month depending on the city or area you choose to live in.
- You will probably have to give one month's rent up-front as a damage deposit. This will be returned to you when you move if your place is left in good condition.
- You will be required to sign a lease, which is a legal document with your landlord that states your responsibilities as a tenant. Leases are typically binding for 1 year.
- Landlords are responsible for keeping the premises in good repair and must give you advance notice (generally 60 days in most Canadian provinces) if they want you to vacate the residence.
- It is illegal for a landlord to discriminate on the basis of race, religion, nationality, gender, age, sexual orientation or disability.
- Your university or college may provide free or reduced legal advice. Use these paralegal services to review the leases.

Canada: Updated Rules for PGWP-Eligible College Programmes and Student Transfers

This article is reposted from ICEF Monitor dated on 8 January 2025

<https://monitor.icef.com/2025/01/canada-updated-rules-for-pgwp-eligible-college-programmes-and-student-transfers/>

Following a flurry of announcements affecting international students throughout past year, Immigration, Refugees and Citizenship Canada (IRCC) provided two important updates in the final weeks of December 2024.

The first expands the list of college programmes for which graduates will be eligible to receive a Post-Graduation Work Permit (PGWP). The second provides clarification on how some students will be eligible for a grace period with respect to new rules about transferring from one institution to another within Canada.

Expanding the list of eligible college programmes

In October 2024, IRCC announced a new “field of study” requirement for graduates of college programmes, including degree programmes, explaining to students that, “If you graduated from a college programme, you must graduate in an eligible field of study in order to be eligible for a post-graduation work permit.”

The effective date for that new policy was 1 November 2024, meaning that students who had applied on or after that date would be bound by new rules, including the field of study requirement. Students who applied for or held a study permit prior to 1 November 2024 remained eligible for a PGWP under the previous rules.

IRCC also provided an initial listing of PGWP-eligible college programmes at the time. This amounted to 966 eligible academic programmes in five broad areas: agriculture and agri-food; healthcare; science, technology, engineering, and mathematics (STEM); skilled trade; and transportation.

The new development in this area occurred on 17 December 2024, at which point IRCC expanded the list of eligible programmes to include nearly 40 additional options in two new fields: early childhood education and developmental service workers.

A grace period for student transfers

On 15 November 2024, IRCC announced that, with immediate effect, students must apply for a new study permit when transferring to a new institution. There was some suggestion at the time, however, that students currently enrolled in Canada would benefit from a grace period before the new transfer rule would apply. In late-December, IRCC clarified the terms under which those cases would be handled.

The grace provisions apply to students who had previously been enrolled in Canada and had been accepted to continue their studies via transfer to a new institution for either the Winter (starting from 1 January 2025) or Spring (starting from 1 May 2025) semesters. IRCC otherwise requires that such students:

- Have already applied for a study permit extension;
- Have a student permit that doesn't have the DLI name printed on it;
- Otherwise be in compliance with all existing study permit conditions.

“If you meet these criteria” IRCC concludes, “You can attend the new DLI you wanted to transfer to while your study permit extension is being processed.”

International Degree Graduates of Canadian Colleges No Longer Have to Meet “Field of Study” Requirements for Post-Study Work Permits

This article is reposted from ICEF Monitor dated on 12 March 2025

<https://monitor.icef.com/2025/03/international-degree-gradates-of-canadian-colleges-no-longer-have-to-meet-field-of-study-requirements-for-post-study-work-permits/>

Immigration, Refugees, and Citizenship Canada (IRCC) has revised its requirements so that international students in degree programmes delivered by Canadian colleges will now no longer have to meet a field-of-study requirement to be eligible for a Post-Graduation Work Permit (PGWP). That requirement had been put in place in 2024 for Canadian colleges but not universities, and it was part of an effort by the Canadian government to apply heavier scrutiny to the international education sector.

“Graduates of college degree programs will no longer be required to meet the PGWP field of study requirement,” said Canadian Bureau for International Education CEO Larissa Bezo, who was commenting on the rule change on LinkedIn.

Contributing to the field-of-study restriction was research showing that international students have been disproportionately represented in business programmes in Canada, particularly in colleges located in urban centres. By contrast, in the US, more than half of international students across degree levels are enrolled in STEM programmes.

Eligibility requirements based on study program

► If you graduated with a bachelor's degree, master's degree or doctoral degree

Language requirement:

You must prove your English or French language skills with a minimum level of Canadian Language Benchmarks (CLB) 7 in English or Niveaux de compétence linguistique canadiens (NCLC) 7 in French in all 4 language areas.

Find out what your language level is based on your language test results.

- If you submitted your PGWP application before November 1, 2024

Field of study requirement:

There are no field of study requirements for graduates with a bachelor's degree, master's degree or doctoral degree.

- If you graduated from any other university program
- If you graduated from any other college, polytechnic or non-university program
- If you graduated from a flight school

IRCC states that international students graduating from degree programmes delivered by colleges or universities are eligible for the PGWP.

Rupa Banerjee, an associate professor at Toronto Metropolitan University who holds the Canada Research Chair in the economic inclusion of immigrants, told CBC News in 2024: “Students are graduating from programs that are not particularly valuable in the labour market, that are not allowing them to get the jobs that will then allow them to transition and become productive Canadian permanent residents.”

The new wording on the IRCC website clarifies that once again, students graduating from all Canadian bachelor's and master's degree programmes – whether from universities or colleges – are eligible for the PGWP if they meet language requirements.

Up, Close & Personal with Canadian Alumni

Cheryl Immanuela graduated from the University of Waterloo with Bachelor of Mathematics, Actuarial Science/Predictive Analytics Option and Statistics. She is also a Fellow in the Casualty Actuarial Society (FCAS) since 2025 and Associate of Casualty Actuarial Society (ACAS) since 2024. Currently serves as Senior Actuarial Analyst at Zurich, Canada, bringing experience from her earlier position as a Senior Actuarial Consultant for almost 4 years at Deloitte.

1. **Hello Cheryl! Thank you for taking the time to be in this interview. As an alumnus who has successfully built a remarkable professional journey overseas, we'd love to take a step back to where it all began. When you were formulating the plan for your post-secondary education, how did Canada come into the equation? Which factors most influenced your decision to study there?**

I actually first discovered Canada when I came across the University of Waterloo at a study fair. What caught my attention was how strong their math program was, especially with the co-op option that lets you gain real work experience while studying. That idea really stood out to me because it felt practical and future-oriented. At that time, most people I knew were going to the U.S., so Canada felt like a fresh opportunity, somewhere I could learn, work, and really build a life while doing something I enjoy.

2. **Canada is recognized as one of the Big Four study destinations globally, offering world-class education and valuable international experience. How has your Canadian education and background contributed to your career growth and professional opportunities?**

When I studied math at the University of Waterloo, the co-op program really changed how I saw education and work. They basically make you find real jobs related to your major while still doing midterms and finals. It was super intense at first, but that pressure really built my work ethic. I remember juggling interviews in between classes and deadlines, but the school actually supports you a lot through it. They help with resumes, interviews, and even guide you in finding the right fit. Looking back, that experience prepared me not just for a career, but for how to handle challenges in any environment.

3. **During your time studying and living in Canada, what practical lesson or experience, whether academic or cultural, that has helped you in your personal or professional life?**

One big thing I learned living in Canada is how people really value balance. Everyone works hard, but they also make time to rest and enjoy life, whether that's spending time outdoors or just hanging out with friends. It taught me that you can be productive without burning out, and that taking care of yourself actually helps you do better work. That mindset has stayed with me both personally and professionally.

4. **Canada is well-known for having different varieties of Work-Integrated Learning programs, including the largest Co-op in the world. What would be your best advice for international students who plan to pursue similar opportunities?**

My advice would be to be proactive and don't lose hope. The first couple of years are definitely the hardest since you're competing with upper-year students who already have experience, but it really does get easier. Just keep applying, learn from every interview, and don't take rejections too personally. Also, try to get involved like joining clubs, talking to people, building connections. You never know which opportunity might come from a casual chat or a new friend.

Up, Close & Personal with Canadian Alumni

Cheryl Immanuela graduated from the University of Waterloo with Bachelor of Mathematics, Actuarial Science/Predictive Analytics Option and Statistics. She is also a Fellow in the Casualty Actuarial Society (FCAS) since 2025 and Associate of Casualty Actuarial Society (ACAS) since 2024. Currently serves as Senior Actuarial Analyst at Zurich, Canada, bringing experience from her earlier position as a Senior Actuarial Consultant for almost 4 years at Deloitte.

5. Nowadays some students and parents were concerned about finding work opportunities during or after study? Any practical tips to share with them?

My main tip would be to stay organized and don't give up. Make a plan for when you'll focus on studying and when you'll focus on looking for jobs or networking.

6. Before we wrap up, could you share one nugget of wisdom for Indonesian students to keep in mind when preparing to study in Canada?

Honestly, be ready for the winters!! They're colder than most people expect! And when you're applying, don't be afraid to make mistakes or face setbacks, because every step is part of the learning process.

Thank you so much for sharing your personal journey and experiences studying in Canada. Your story will surely inspire and help many students preparing for their own paths. Wishing you continued success in your journey ahead!

UNIVERSITIES

Canadian universities prepare graduates with the ability to think critically, to be adaptive to emerging technologies, to become leaders in professional fields, and to seek solutions in research. Whether you want to become a teacher, economist, artist, or the world's leading nanotechnologist, Canada's university system will provide you with the choice that fits your interest. From small liberal arts teaching schools to larger research-intensive universities, you can begin your bachelor studies and continue to earn the highest qualification, a PhD. University research makes its mark in Canada and around the world.

Did you know that Canadian universities have been incubators for innovation such as the BlackBerry phone, flat-screen technology, SMART boards, and IMAX film?

Highly innovative research takes place in the fields of health, nanotechnology, biotechnology, high-performance computing, environmental technologies, nutraceuticals, and renewable fuels. More than one-third of Canada's research is conducted at Canadian universities – one of the highest rates of academic research among OECD and G8 countries.

Three levels of degrees

- Bachelor's: generally three or four years of undergraduate study
- Master's: one or two years of study after the bachelor's degree, including a thesis, practicum, research paper, or course-based
- Doctoral: three years of study including a thesis, usually after the master's degree

The facts

- There are more than 15,000 undergraduate and graduate degree programs at 100 public and private not-for-profit universities and university-degree-level colleges.
- Degrees follow the Bachelor/Master/Doctorate system and are equivalent to those in the U.S. and Commonwealth countries.
- Vast choice of undergraduate and post-graduate programs, as well as professional designations, certificate and diploma courses, and short career-focused programs.
- Cutting-edge technology and research labs.
- Opportunities for cooperative education and internships, and international students can often work while they study.

Why choose a university in Canada?

- Caring and supportive professors
- Cutting-edge technology and research labs
- Co-operative education (co-op) and internship options
- Opportunities to work on and off campus
- Great campus life
- Academic advisors who provide valuable guidance
- Health services for students and assistance programs offering support for students with disabilities
- Athletic activities and student clubs that connect you with other students
- Career development services and alumni networks to help you meet your goals

POLYTECHNICS & COLLEGES

+ Colleges work very closely with business and industry to ensure that their programs are relevant to the changing workplace and to the needs of employers.

Canadian college programs offer diverse options in the technical and professional fields including: business, agriculture and agri-food, health, social services, broadcasting and journalism, hospitality management, design, technology, sciences, information technology, engineering, environment, languages, and arts.

The facts

- Over 8,000 college programs at 135 public institutions offer credentials that are approved by provincial and territorial governments.
- Offers a variety of recognized credentials like certificates, diplomas, university transfer programs, academic and applied degrees, and post-graduate diplomas.
- Programs vary in length from a few months to 4 years.
- 90% of college graduates, on average, obtain employment within 6 months of graduating.
- 93% of employers are satisfied with college graduates in Canada.
- Practical programs are designed with potential employers that also offer work placements.

Why choose a college, CEGEP, or polytechnic in Canada?

- Earn a certificate or diploma in a short-term outcome-based program.
- Programs meet student needs and provide career-specific training.
- Benefit from small class sizes and individualized attention; intensive training in a short period of time; and multiple intakes throughout the year.
- Practical programs meet the needs of specific industries and employers.
- Work placements are available through co-op education and internship.
- Cutting-edge technology enables flexible program delivery.
- 95% of college graduates are employed. **+**
- Over 10,000 programs offered.

YOUR
VOICE**

Established in 1936, Columbia College proudly serves as one of Canada's longest established international not-for-profit colleges.

Just east of Vancouver's downtown core, we are just 10 minutes drive from downtown Vancouver.

With easy access to everything you need, Columbia College is the ideal place to continue your education and experience life in Vancouver, one of the world's greatest cities.

FOLLOW US!

@COLUMBIACOLLEGE1936

OUR PROGRAMS

UNIVERSITY TRANSFER

Take up to 60 credits at first and second year level at Columbia College and then direct transfer to any university in British Columbia and across Canada. You will graduate with a degree from the university to which you transferred.

ASSOCIATE DEGREES

An Associate Degree is equivalent to the first two years of a four-year university degree. With an Associate Degree, you can enter into the third year of a university's bachelor's degree program or apply for a Post-Graduate Work Permit (PGWP) in Canada.

HIGH SCHOOL (GRADE 10-11-12)

Our High School programs are certified by the Province of British Columbia. Students can take up to 12 courses per year which helps them to graduate faster.

THE COLLEGE OF HIGHER LEARNING.

3 WAYS TO OPPORTUNITY FOR SAULT COLLEGE INTERNATIONAL STUDENTS

#1 It's affordable and fun to live here

Along Canada's Great Lakes, Sault Ste. Marie offers an immersive Canadian experience, a relaxed lifestyle and a very low cost of living compared to other cities. Whether you enjoy hiking and camping, jogging or walking along the boardwalk, street parties or summer concerts, it's the ideal spot to study, work, thrive and explore Canada.

#2 Undergraduate and graduate opportunities

Sault College offers a variety of diplomas, certificates, advanced diplomas and degrees in a wide range of subjects and disciplines, including our 2+2 diploma to degree program pathway — complete a two-year diploma with us then move on to university to complete your degree in two more years or take advantage of a wealth of employment opportunities. We waive application fees and also offer scholarships for international students. Our top three programs include:

Early Childhood Education (ECE): This amazing program provides exclusive research-based training for students passionate about inspiring children. ECE also offers hands-on experience — a huge advantage when entering the workforce — as well as training from The Hanen Centre®, which promotes children's social, language and literacy development. In addition to job opportunities after you graduate, you can continue your education at the university level by transferring eligible earned credits to partnering schools.

Occupational Therapist Assistant (OTA): This program prepares you to help people with illness, injury or disability to increase their independence and overcome challenges of daily life. Through theoretical and practical learning in the classroom, lab and field placements, you'll gain core skills and hands-on experience. You can also continue your university-level education to earn a degree or work alongside registered occupational therapists, providing vital healthcare services.

Practical Nursing: This two-year program offers foundational knowledge, skills and values to demonstrate safe, competent practice as a licensed practical nurse. You'll have access to our state-of-the-art Adult Medical-Surgical Simulation Lab and a variety of other labs where you can focus on communication, critical thinking and hands-on skills. As a graduate, you'll be eligible to write the Regulatory Exam — Practical Nursing (Rex-PN) and have the opportunity to make a difference in your chosen community.

#3 This way to immigration opportunities

Sault Ste. Marie, Ontario, was chosen for the new Rural Community Immigration Pilot (RCIP) program that offers more opportunities for international students to live and work after you graduate. As a Sault College graduate, you could be eligible to apply for permanent residence in our diverse and welcoming community.

Opportunity is waiting for you. Contact your Regional Manager directly for more information.

ELEMENTARY & SECONDARY EDUCATION

Canada's elementary and secondary schools follow a government curriculum and employ government certified teachers, ensuring a high level of quality and a focus on individual student needs. This successful environment is highly acclaimed as school students excel in science, reading, and mathematics.

Canadian students have consistently been among the top 5 academic performers in the world and number 1 among English-speaking countries according to the OECD PISA studies in reading, mathematics, and science.

Students may choose from public or private school options.

In addition to the high quality of teaching, Canadian schools provide students with a nurturing environment through student services and pedagogical services such as: counselling, academic and professional advisers, community involvement, second language support, special needs learning, tutorial sessions and extracurricular activities

The facts

- Elementary schools are grades 1 - 6.
- Secondary schools are grades 7 - 12 in most provinces, with the exception of Quebec where secondary school runs from grades 7 - 11.
- The school year runs from September - June.
- Canadian high school diplomas are recognized by colleges and universities worldwide.
- English as a Second Language (ESL) or French as a Second Language (FSL) courses are available to support international students.

- Schools are the responsibility of the ministry or department of education in each province and territory.
- All schools must register with and meet the curriculum and graduation requirements set by the Ministry of Education for that province/territory.

Public schools

- Offer co-educational day programs.
- Homestay programs are available for international students.

Private schools

- Independently funded.
- Co-educational, or boys-only, or girls-only.
- Smaller class sizes and lower teacher-student ratios.
- Full boarding or homestay programs are available for international students.
- The legal status of private schools varies across Canada as each province or territory is responsible for the regulatory environment of schools in its jurisdiction.
