

Indiana Pregnancy Promise Program

Promoting Recovery from Opioid Use: Maternal Infant Support and Engagement

A part of the U.S. Centers for Medicare and Medicaid Services Maternal Opioid Misuse grant

September 13, 2021

Greetings Indiana Providers,

The Family and Social Services Administration (FSSA) Pregnancy Promise Program team would like to share key updates since the program launched on July 1, 2021. The Pregnancy Promise Program is an initiative introduced by the FSSA in partnership with four Medicaid Managed Care Health Plans – Anthem, CareSource, MDwise and Managed Health Services (MHS). The program is made possible through funds from the Centers for Medicare and Medicaid Services (CMS) and the Department of Health and Human Services (HHS). The Pregnancy Promise Program aims to identify pregnant Medicaid beneficiaries with opioid use disorder (OUD) and connect them with prenatal and postpartum care, behavioral health support, OUD treatment and recovery services, and address the health-related social needs of the family. The goal of the Pregnancy Promise Program (Promise= Promoting Recovery from Opioid use: Maternal Infant Support and Engagement) is to identify participants as early as possible in the prenatal period, connect them with enhanced case management and care coordination services beginning in pregnancy and continuing through 12 months postpartum for both the parent and infant.

To be eligible for the Pregnancy Promise Program, an individual must be currently pregnant or within 90 days of the end of their pregnancy, have current or past opioid use, and must be eligible for Medicaid health coverage. Referrals can be made through the website, over the phone, or through email. Since July 1, 2021, the Pregnancy Promise Program has already identified over 500 individuals across the state who meet eligibility criteria and would benefit from the program.

Attached you will find Pregnancy Promise Program outreach materials in English, Spanish, and Burmese. Please download, print, and disseminate broadly across colleagues and networks. Additionally, as you are discussing referrals with potential enrollees, please share the attached consent form. Signed consent forms can be returned to the individual's Managed Care Health Plan prior to enrollment.

Additional information can be found on the Pregnancy Promise Program website www.pregnancypromise.in.gov, email PregnancyPromise@fssa.in.gov, or by calling toll-free 888-467-2717 or local 317-234-5336.
