The 25th Stickler – Final Results
Sunday 27/10/2019, 10:30am

Note: It came to our notice after the event that a number of runners were wrongly directed at around the 1.5 mile mark on the course. At this point the course was correctly signed, but someone (not a marshal and not wearing Hi-viz) wrongly directed a number of the leading runners away from the correct route, even calling some back from the correct route and directing them the wrong way. This error resulted in these runners starting to run a section of the course in the wrong direction. After a few hundred yards they were turned back by an official marshal, so retraced their steps. Unsurprisingly this caused great confusion, and although most of these runners re-joined the course at the correct point, others did not and as a result eventually reached the finish having not completed the whole course. We have considered the situation carefully, and decided to leave these runners in the results but not show their positions. They are instead marked with an asterisk (*) in the place column.
