

Dear Parents,

Can you believe we are already halfway through the year? Time truly flies when you are learning and growing — and that's exactly what our children have been doing!

I would like to take a moment to sincerely thank you for your continued support. It truly makes a difference to have such a caring and engaged school community behind our children. Our teachers have been doing a fantastic job in creating a positive and enriching environment, and we've seen great progress in many of our students.

Thank you as well for taking the time to meet with us during the recent Parent-Teacher Conference. It was wonderful to connect with you, hear about what your children are enjoying, and discuss areas where they may benefit from a little more focus. Looking ahead, we have some exciting activities and learning experiences planned — so do stay tuned!

Thank you once again for being such an important part of our school family. Let's continue working together to make this term a meaningful and successful one!

TERM 2 CLOSURE DATES

- 9 Aug: National Day
- 4 Sept: Staff Retreat
- 5 Sept: Teachers' Day

INFANT

Sandy Sand

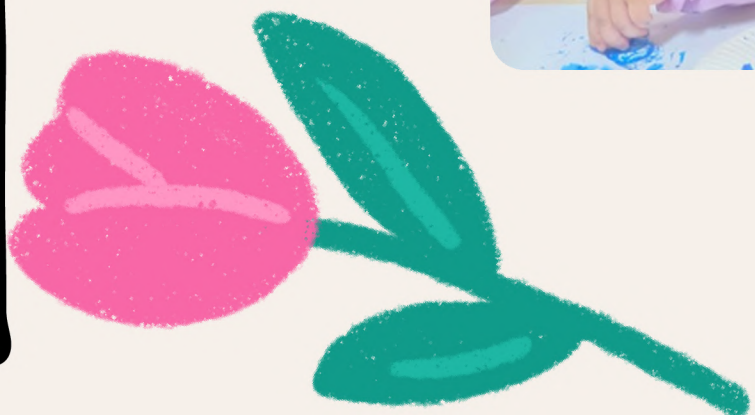

The Infants were given the opportunity to explore using their sense of sight and touch during the activity. They observed and felt the texture of the sand, using their fingers and hands to mix and scoop. This sensory experience encouraged curiosity and active engagement in hands-on exploration.

Wassily Kandinsky – My Circle Mat

The children explored the vibrant world of artist Wassily Kandinsky, drawing inspiration from his famous concentric circles artwork. Using paint and tools such as sponges and bottle caps, they created their very own 'Circle Mats', a colourful celebration of shapes and creativity.

As part of the experience, the children were also encouraged to share materials with their peers, helping to build important social and cooperative skills while expressing themselves artistically.

TODDLER A

Banana Treats

The toddlers were engaged in a cookery session where they got their hands busy making cute banana bites. Look how the bananas were carefully sliced and topped with a colourful dash of sprinkles!

They had successfully turned a simple snack into a creative one which they then enjoyed with big smiles. What a yummy, colourful treat it was!

The Suncatcher

Our little explorers had a wonderful time creating nature-inspired sun catchers using leaves that they collected during their nature walk.

With careful fingers, the toddlers arranged the leaves for their suncatchers. Then, they explored the shapes, colours, and textures of the leaves as they completed their craftwork.

TODDLER B

Banana Peelers

The Toddlers demonstrated focus and determination as they attempted to peel the skin of the bananas, an activity that helped strengthen their fine motor skills.

With guidance, they continued to cut the bananas using a plastic knife and carefully topped them with sprinkles, creating a visually appealing treat. This experience supported their hand-eye coordination, concentration, and creativity.

Rolling Ball

The children were actively engaged as they took turns rolling a ball to their friends sitting opposite them. This activity helped enhance their hand-eye coordination as they aimed and gently rolled the ball to one another.

Their excitement was apparent as they waited for their turn to roll the ball. The children certainly enjoyed this activity!

NURSERY 1A

Stamping Fruits

The children were introduced to the concept of 'rainbow fruits' where they discovered a variety of fruits in different colours.

They excitedly observed the paints laid out on the table and tried to match them to the fruit stamps they selected, such as red for strawberries, orange for oranges, and purple for grapes.

After identifying a few fruits on the stamps, the children carefully applied matching paint colours to the fruit stamp they had selected and made imprints on paper.

The Citrus

The Nursery 1A children were each given a fresh orange to explore using their senses. They eagerly touched and smelled the fruit, noticing its bumpy skin and sweet citrus scent.

With excitement and curiosity, they used their little hands and fine motor skills to squeeze the orange, watching the juice slowly collect in their cups. Some children giggled at the sticky feeling on their fingers, while others focused intently on getting every drop.

Big vs Small

During their numeracy lesson, the children learnt about the concept of size, focusing on big and small. They identified basic shapes and made comparisons between different sizes through hands-on activities. It was wonderful to see them working together and actively engaging in the task, demonstrating cooperation and an interest in their learning.

NURSERY 1B

Healthy Plate

The children had an opportunity to make good food decisions and created their own Healthy Plate. They chose their favourite foods by selecting from a variety of food pictures in a basket, and then pasted their choices onto a paper plate. As they worked, they engaged in conversations about healthy eating habits with one another. Once completed, the children proudly presented their Healthy Plate in a show-and-tell session, where they explained their healthy food choices to their peers.

NURSERY 2A

Jumping Letters

The N2A children hopped joyfully from square to square during their phonics hopscotch game. With each jump, they eagerly shouted out the corresponding letter name with confidence.

The mix of movement and learning turned the lesson into a lively activity, making phonics fun while strengthening their letter recognition and sound awareness. What a great way to learn through play!

The 'Growing Beans' activity introduced the Nursery 2A children to different types of beans. They had an opportunity to observe the beans' unique shapes, colours and sizes.

Through this hands-on experience, the children began to understand the basic needs of plants and were excited to observe how the beans would begin to sprout over time.

Growing Beans

NURSERY 2B

Our Games

As part of Cultural Week, the children were introduced to traditional Malay games such as Five Stones and Capteh. With focus and enthusiasm, they used their hand-eye coordination to play and tried their best to score points. Through these engaging activities, the children developed a deeper appreciation and understanding of Malay culture while also strengthening their motor skills and teamwork.

Celery Experiment

The children were given an opportunity to examine celery using their senses — touch, sight, and smell. They then added a few drops of food colouring to water and placed the celery stalks into the coloured water. Over the next few days, the children observed the celery to see if there were any changes in colour and noted their observations down on the record sheet. This activity had certainly sparked their curiosity and encouraged scientific thinking through hands-on experimentation.

NURSERY 2C

“ Let's gallop!

During their gross motor session, the children headed outdoors to work on their galloping skills. They took turns pretending to ride on toy horses, using them as props to guide their movements with much enthusiasm and glee. As they galloped across the play area, the children focused on coordinating their legs and maintaining rhythm.

”

Bean Adventure

The children delved into a bean-filled adventure, using their senses and discovery tools to examine and discover alongside their friends. With picture guides in hand, they became little detectives, identifying each bean and capturing their findings through fun and creative drawings!

KINDERGARTEN 1

Bean Investigator

As the children learnt about the different parts of a bean, they also had the chance to experiment with growing one themselves! They carefully placed cotton wool in a cup, sprayed it with water, and chose a bean to plant. Then, in their little groups, they observed their growing beans closely — noticing any changes and drawing what they saw to record their discoveries.

Being Kind

The children participated in a role-play activity where they experienced the challenges faced by a visually-impaired person, and learnt what we can do to assist them. The child role-playing as a visually-impaired person donned a sleep mask to cover their eyes, while two other classmates guided them carefully to their seat. In the process, the children gained insight into the daily challenges faced by individuals with visual impairments and learnt simple yet thoughtful ways to offer support and show kindness to people with disabilities.

KINDERGARTEN 2

LET'S SKIP!

The children ventured outdoors to practise their gross motor skills through a fun and active skipping game. They were encouraged to skip using alternate legs, focusing on coordination and balance. Hula hoops were placed on the ground as safe zones, which the children had to quickly skip into to avoid being tagged by the catcher. It was a game of tag with a fun difference!

PANDAN LEAVES EXPLORATION

The Kindergarten 2 children were excited to explore pandan leaves! Using discovery tools, they closely examined the different parts of the leaves and eagerly shared their prior knowledge with their peers. As part of the activity, they trimmed the bottom of the leaves and decided to plant them in eggshells, creatively repurposing them as pots.

This hands-on experience allowed the children to observe how new plants can grow from existing ones, fostering their understanding of sustainability and the importance of reusing natural materials.

I CAN SPY! NATURE

Look what happens when you rub two twigs together — they make a sound! It's like creating your own musical instrument using elements from nature!

The children had fun collecting dried leaves, listening closely to the crackling sounds they made while squeezing and tearing them — like nature's very own sound effects!

The children went on a leafy adventure, collecting all kinds of leaves in different shapes, sizes and colours! Then, using paint and paper, they pressed their leaves to reveal beautiful prints, turning nature into art with every stamp.

NATURE MAGNIFIED

This term, the children were introduced to the importance of caring for our planet. Through meaningful, hands-on activities, they stepped into the role of young ecologists, learning simple but powerful ways to help the Earth.

The children created thoughtful posters to spread awareness, helped pick up rubbish littering their surroundings, and learnt all about the 3Rs – Reduce, Reuse and Recycle. These experiences helped them understand how small actions can make a big difference.

HARI RAYA AWARENESS DAY

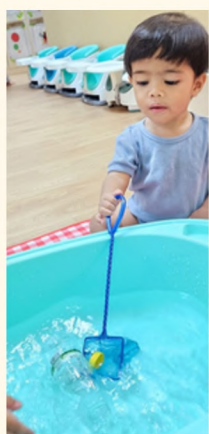

Our centre buzzed with excitement during Hari Raya Awareness Day! The children rolled up their sleeves to make tasty traditional goodies, giggling as they mixed and shaped their delicious creations.

The fun continued with a special Hari Raya workshop for parents and children! Together, they learnt how to weave ketupat using colourful pipe cleaners, turning this traditional craft into a creative and joyful hands-on activity.

Selamat Hari Raya Idul Fitri

Our little eco-heroes celebrated Earth Day with big hearts and curious minds! They explored the outdoors, discovering the wonders of nature while learning how to care for our planet.

The children got creative by making props and musical instruments out of recycled materials, learning in the process that we are able to turn everyday trash into treasure. They also designed colourful posters to spread the message about caring for our planet, showing their big hearts and bright ideas for making a difference.

DISPOSITION DAY: TOGETHER WE CARE, TOGETHER WE GROW

As part of our ongoing efforts to care for the community and the environment, the children visited Bollywood Veggies.

The children were excited as they explored the big, green farm — walking among tall trees, colourful fruits, and leafy plants. They touched, smelled, and asked many questions about the type of plants that grow in a tropical garden.

What a wonderful way to learn about caring for the Earth and our community!

MOTHER'S DAY

Mother's Day was a special celebration full of love and creativity! The children put their hearts into making beautiful handmade cards and thoughtful gifts to show just how much they appreciate their moms.

With smiles and giggles, they shared stories and reflected on the importance of kindness and gratitude. It was a joyful day that reminded everyone how wonderful it is to celebrate the amazing mothers in our lives!

WARISAN BUDAYA

Murid-murid diperkenalkan kepada seni silat melalui pergerakan asas dan aktiviti meniru yang menyeronokkan. Mereka mendengar dengan baik, mengikuti arahan dengan teliti, dan kelihatan gembira sepanjang sesi.

WENHUA YICHAN

老师用彩纸粘贴九宫格梅花桩，幼儿在老师的指导下可以在九宫格上随意蹦跳。

老师准备武术-太极服装，幼儿跟随老师和武术视频一起模仿。

幼儿看图片和讲解视频后，幼儿和老师一起学习打坐。老师指导幼儿练习，每个人都很认真开心。

幼儿身着练功夫，通过视频的了解功夫文化并专注模仿，招式初具雏形。展现出良好的学习吸收能力与武术兴趣。

PARENTS' TESTIMONIALS

When my son first transferred to this childcare, he took a while to adjust to the new environment. But now, he is thriving and will come home with many stories to share. The teachers as well as admin team are also very responsive.

Thank you to Teacher Nura, Teacher Nur, Cikgu Fi, and Teacher Shakilah, for being attentive, caring, kind, and patient to my active and chatty toddler.

My only regret is not sending him here earlier and only finding out about this place when we were moving out of Punggol. Still, I am glad that he was able to attend Kidz Meadow @ Punggol while we were still Punggolians.

Mdm Shairfah
Parent of Haider (N1A)

My husband and I are grateful for the care and education my child has received here. Teacher Nura is warm, patient and genuinely cares about my daughter. My child always comes home happy and has no issue going to school too. It is amazing to see how much my daughter has grown in curiosity and confidence in completing her tasks since starting here with the guidance of all the teachers.

Thank you Teacher Nura and Cikgu Fi for being such a nurturing and encouraging presence in our child's life. We will always be grateful for the role you have played in these precious years.

Our PMVV (Philosophy, Mission, Vision & Values)

Philosophy

We believe in providing an engaging and positive environment for the children to develop to their potential to the fullest in all aspects of development.

Mission

We work towards providing a quality and innovative programme that nurtures children to be socially responsible citizens, active learners and thinkers.

Vision

We aim to be a A First-Class Provider in Early Childhood Care & Education.

Quality & Innovative Programme

Nurturing children to be socially responsible citizens, active learners & thinkers
Community & Parental Involvement
Active Learners
Resourcefulness
Excellence

1st Class Provider

C

Community and Parental Involvement

We build a strong and trusting partnership with the parents and the community to enhance the development of the children.

A

Active Learners

Children are natural and active learners. Through project work, thematic and integrated learning, they are given opportunities to explore, gather information and share knowledge.

R

Resourcefulness

We continuously upgrade our teaching and learning resources in line early childhood education trends to enhance children's learning experiences.

E

Excellence

We strive for excellence in everything that we do.
