

COMPOSTING WITH COMPOST CREW

NERC Webinar
Stakeholder Engagement with Local Farms
and Agriculture Partners
November 20, 2025

ABOUT COMPOST CREW

Compost Crew is a Maryland-based business that diverts tens of thousands of tons of organic waste from landfills, each year.

We haul organic waste from over 20,000 residents and businesses across the DMV.

We offer a variety of services including weekly curbside pick-up, community programs, drop-off locations, roll-off and operating local composting sites.

"Our mission is to protect the planet, reduce waste and build community wealth. We are committed to recovering compostable waste, reducing dependence on landfills and incinerators, and revitalizing our soils. We will never compromise on that commitment."

LET'S REDUCE FOOD WASTE, TOGETHER!

REDUCE

Limit the amount of food planted, purchased or cooked

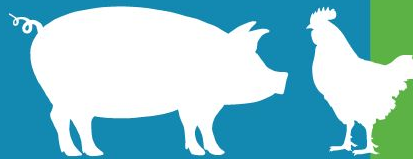

GIVE

Locate food shelters, soup kitchens, and other organizations that disperse food to the community

ANIMALS

Reach out to local farms about donating scraps as feedstock

COMPOST

Divert organic waste from landfills and give it new life as a nutrient-rich soil amendment

LANDFILL

Reduce, reuse, recycle, compost, then chose the landfill as the last resort

PROMOTING A CLOSED LOOP SYSTEM

Participants may divert their waste from landfills by separating organic scraps into their Compost Crew bin

Every week, Compost Crew collects these scraps and processes them at a nearby composting site

They are then transformed into healthy soil that can be distributed and used at local schools, gardens, or farms

DECENTRALIZED COMPOSTING

The Compost Outpost® is a modular composting site that can be installed on less than a quarter acre of land and deployed in a variety of configurations within just a couple of months.

We operate at multiple locations in Maryland.
