The world is pumping out 57 million tons of plastic pollution a year

ARGUMENT *An expert's point of view on a current event.*

No, Recycling Won't Solve Our Plastic Problem

The world must come together to address the full life cycle of this ubiquitous material.

And it's making us sick, especially when paired with food.

Tried plastic-based reuse for residential dining.

Only 4% of containers remained after one year.

Switched to USEFULL plastic-free program.

Now containers circulate with a 99% return rate.

Tried plastic-based reuse for retail dining.

Fewer than 1,000 container uses after a year with low return rates.

Switched to USEFULL plastic-free program.

Now seeing 140K checkouts a year.

SUNY Chancellor King Announces Phase Out of Single-Use Plastics Across SUNY System

March 5, 2024

*Phase Out Will Occur Over Several Years at System Administration and on all
SUNY Campuses*

*Policy Builds on Legislation Signed by Governor Kathy Hochul to Mitigate the
Impact of Single-Use Plastics on SUNY and CUNY Campuses*

Albany, NY – State University of New York Chancellor John B. King, Jr. today announced a uniform policy across the SUNY System to phase out the usage of single-use plastics. The policy will ensure SUNY advances real environmental progress while staying in step with groundbreaking legislation signed by Governor Kathy Hochul encouraging SUNY and CUNY campuses to phase out single-use plastics.
