

Modular UDC's from Bravo are assembled and tested with only the final product piping connection needing to be done in the field. Manufactured using Bravo UL2447 listed UDC's and only high-quality interior components, the Modular Series greatly reduces the field assembly needed within the confines of the sump. Reduce installation time with the only pre-assembled deep sump on the market for flexible piping systems. Go fast, go modular!

Features & Benefits

- Pre-assembled UDC for OPW & APT flex-pipe
- Hydrostatically tested at the factory
- Primary connections factory tested at 50 psi
- UL2447 listed Bravo sump with industry leading corrosion warranty
- Stainless steel riser assemblies
- Utilizes Bravo NEXT Series rigid compression entry fittings
- Electrical offsets on both ends of the UDC
- For 1.5" - 2" flex-pipe
- Only requires the product piping connection done from inside the UDC
- Simplified installation

INNOVATIVE SOLUTIONS FOR SECONDARY CONTAINMENT
