

Touching My Body

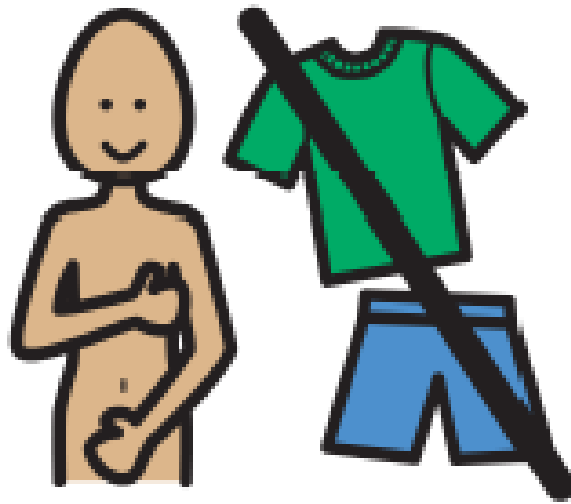

My body is mine

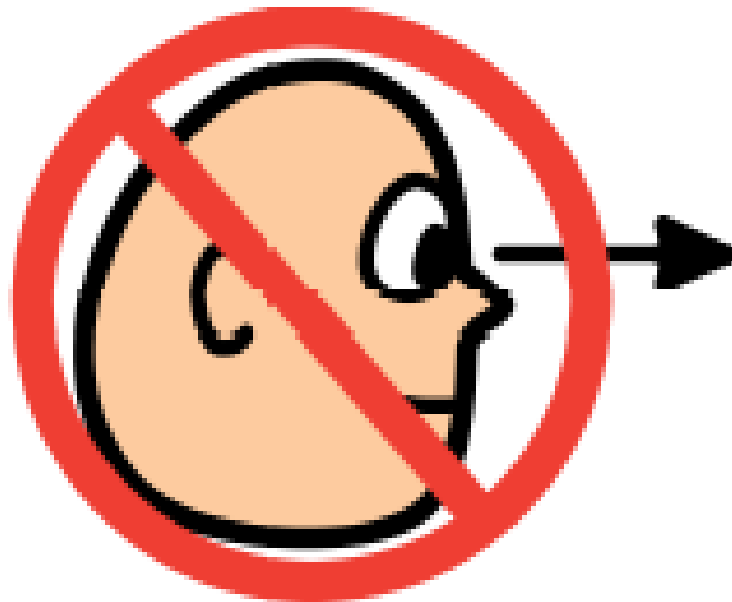

I can touch myself

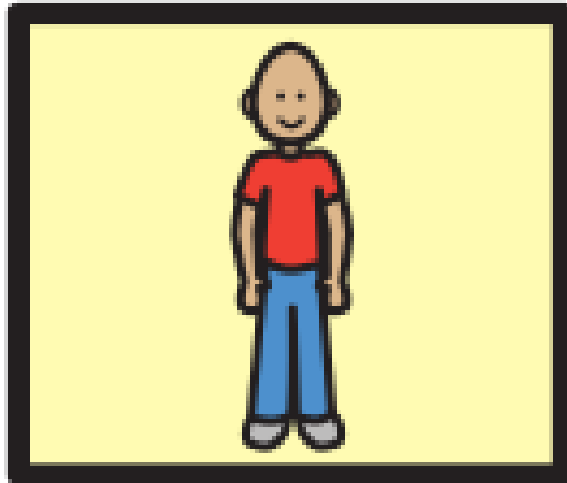

Some touches feel very good

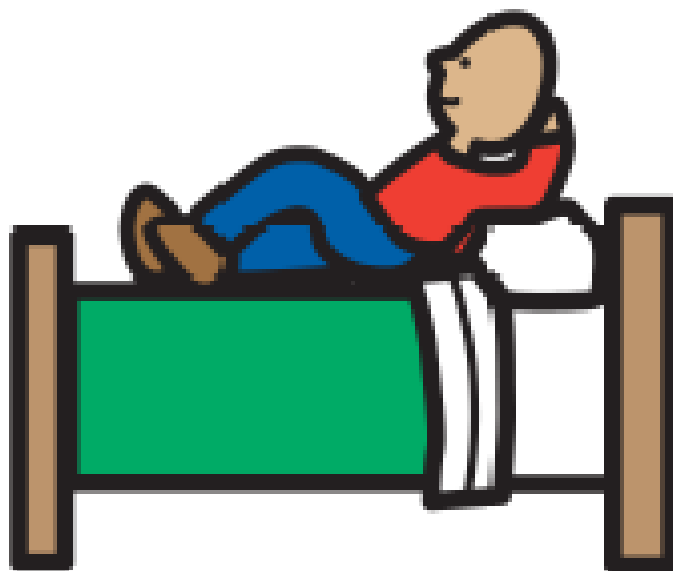

I like to touch my private parts

But NO ONE should see me touch my
private parts

Touching my private parts is something I
do
when I'm alone

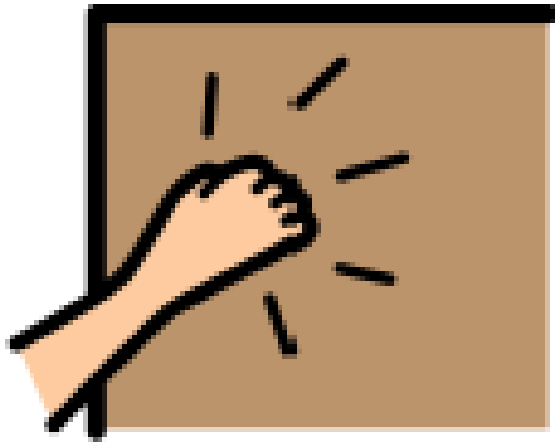

My bedroom is a private place

The bathroom is a private place

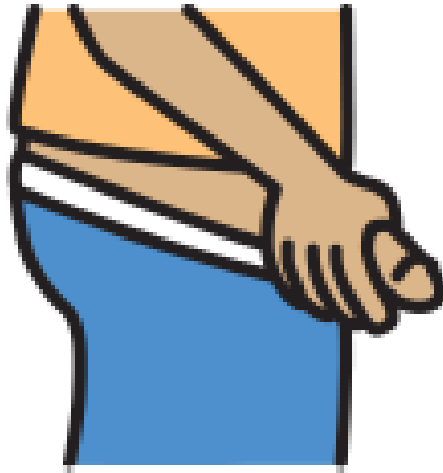

I will close the door so I can have privacy

If someone comes to my door, I can say
'I'm busy'

I can look at a magazine with pretty girls or
boys at my house in my bedroom

It is okay for ME to touch MY OWN penis
and testicles
in my house, in private

I cannot touch my penis when I am in the
car

I cannot touch my penis
when I am out with other people

I cannot touch my penis when I am in the
swimming pool

I cannot touch my penis
when I am cooking

If I touch myself when I am looking at other
people, it scares them. The Police might
come and talk to me

Touching myself is one way I make myself
feel good.

And that's okay if I am alone, in my house.
