Position Description

We are seeking an experienced Weapons & Tactics Trainer (Incident Responder) to support the development and delivery of U.S. Space Force Incident Response Upgrade Training. This program enhances the proficiency of Incident Responders in Hunt and Clear missions across space and satellite networks.

You will deliver in-depth instruction on current cyber Tactics, Techniques, and Procedures (TTPs), lead scenario-based exercises, and conduct simulated cyber events that sharpen operational readiness. This role directly impacts national defense by preparing cyber warriors to defend critical space-based assets against advanced threats.

Position Objectives

Provide advanced instruction on incident response strategies, cyber operations protocols, and best practices. Organize and conduct simulated cyber events that immerse students in real-world threat environments. Develop and facilitate scenario-based exercises to strengthen decision-making and problem-solving skills. Apply Instructional System Design (ISD) methods to develop and refine curriculum. Contribute to the advancement of DoD Cyber Weapon (DCW) Training programs on weapon system and mission system OT (Operational Technology). Mentor, evaluate, and provide feedback to students in incident response and hunt mission execution.

Required Qualifications

7+ years of DCW experience in a DoD Cyber Unit (e.g., AFCYBER, ARCYBER) conducting:

Cyber Threat Hunting Missions

Cyber Threat Emulation

Incident Response

2+ years of experience developing DCW Training for Weapon System or Mission System OT.

2+ years of experience with Formal Instructional System Design processes.

Completion of a formal instructional course (WIC, AETC BIC, SpOC IQC, or equivalent as approved by CO/COR).
