DELIVERED EX-STOCK
with proven protective packaging.

M2 Olympic handles, cuts and machines well. It can be High Frequency Welded.

Our rolls have almost zero faults saving time and cost compared with products from most competitors.

STANDARDS

M2 Olympic meets all appropriate requirements in BS EN 1176; Part 10 and BS EN 14960 applicable to Indoor Play, Softplay and Inflatables.

It also conforms with the requirements for these products within EN71-3, Reach Requirements & Directives, which are EU law. M2 Olympic meets the requirements, at no extra cost, of the "4P Test for Phthalates" relating to DEHP (Bis(2-ethylhexyl) phthalate), DBP (Di-butyl phthalate), BBP (Butyl benzyl phthalate) and DIPB (Diisobutyl phthalate).

EU countries are increasingly insisting that products intended for children's play conform with the "4P Test for phthalates".
