MANUFACTURED BY WARWICK GATES

HD2 Super

The Powershift HD2 post driver is a tough hard-hitting machine aimed primarily at those who only want to drive straining posts. Fence stakes can be driven also, but the Profi or Agri models are much better suited for this operation as the masts are side mounted. The machine weight of approximately 1,070 KG and a 500 KG hammer, is an ideal weighted machine for contractors working on very steep or soft hill ground. The powershift HD2 can be used on diggers, loaders and telehandlers, as well as tractor 3-point linkage.

Features:

- 500kg hammer travels full length of mast
- Hydraulic top link standard, mast tilt left and right
- Mast slides 350mm from centre to right to allow posts to be kept in line with the mast
- Simple twin pulley telescopic mast
- Independent post cap slide rail system
- Special maintenance-free post cap
- Rock spike available
- HD2 side shift feature
- Many more features included with standard post driver

Prices start from \$16,500 + GST, contact us for a tailored quote to suit your operation.

HD2 Forest Supreme

The Powershift HD2 Forest Supreme post driver is a tough hard hitting in line machine aimed primarily at those who only want to drive straining posts. The Powershift HD2 Forest Supreme post driver is similar to a HD2 Super with a few extra features and capabilities included for maximum efficiencies.

Features:

- Side shift offers 500mm of travel and moves to the left and right of centre
- Backshift offers 250mm of travel
- Independent hydraulic legs for stability and extra hammer height
- Hydraulic mast tilt left and right
- Hydraulic mast tilt backwards and forwards
- Centrally mounted mast moves left and right of centre
- 500kg hammer
- 95mm rock spike fitted as standard complete with floating head and emergency release
- The rock spike can be driven down 1.2m deep
- Many more features considered "standard" included, contact us for details

Purpose built post driver

for fencing contractors

Profi Supreme

The new Profi Supreme post driver has fully automatic twin pulley mast, no other manual or mechanical means are required to alter the length of the hammer stroke. This is without doubt the simplest, tidiest and most efficient telescopic mast on the market. The Profi Supreme new state of the art hydraulics, with a 4-hose burst safety check valves. Designed that if the hose ever bursts with the hammer in the air it will not come crashing back down. The Profi Supreme has the all new quad shift that can let you reach nearly anywhere.

Features:

- 500kg hammer travels full length of the mast at all times
- Hitting height 3.5m under the state of the art post cap to protect the pole or post
- New mast tilt ram geometry to increase mast tilt in and out
- New giant super skids on hydraulic legs for less vibration and more floatation
- New generation top link hitch point
- Rock spike with rock spike transfer system
- Toolbox, Tow bar
- Larger Hammer weights available

Profi Max Magnum

The Profi Max Magnum is for those who want the ultimate driving force with a 500kg hammer, delivering 81.48 tonnes of impact force to drive the post in. Built with a heavy-duty main frame, 8mm wall thickness to protect the post driver to ensure a long working life. Included in the Magnum is new state of the art hydraulics, so if the hose ever bursts with the hammer in the air it will not come crashing back down to protect the operator.

Features:

- Solid steel counterbalance for balance and stability
- Solid steel hammer 500kgs
- Side shift, 600 mm (24") travel with extra heavy-duty double slide with backshift sandwiched between, plus heavier cross section
- Backshift, 300mm (12") travel,
- Independent hydraulic legs
- Hydraulic top link with 45 tonne certified safety chain and check valve
- Adjustable top link hitch point
- Hydraulic mast tilt left and right with safety check valve
- Post cap holds post to ensures perfect alignment
- Many more features considered "standard" included, contact us for details

Vulcan VR800

Bryce Suma post drivers can now deliver a harder thumping option with the new Vulcan VR800 model, which drops a heavier hammer from a greater height. The Vulcan features Bryce's patented Quadshift, which combines side and back-shift with a slewing motion that helps position the mast in awkward corners and close to obstructions. It also has four-way hydraulic mast adjustments to get it upright, even on uneven ground. The new option of a hook for the rock spike holder, to pull out old posts with a chain. Includes state of the art hydraulics, so if the hose ever bursts with the hammer in the air it will not come crashing back down to protect the operator.

Features

- Closed height (minimum transport) 2.95 metres
- Height under post cap 3.8 mts
- 800kg hammer with smaller weights available
- 600mm side shift, 300mm back shift, 1000mm quad shift
- Independent hydraulic legs with super floatation skids
- Toolbox and tool holders

Bryce 180 Pro

The Bryce 180 Pro, Tracked Fencing Machine is ideal for contractors that need to deal with all sorts of rugged conditions, extreme weather patterns, reducing labour costs while maximise their productivity. The 180 Pro is designed to operate in field conditions where wheeled machines struggle for traction without damaging the property owner's ground coverage. The 180 Pro easily moves over productive grasslands, sandy soil, soft wet black soil or shale and rocky grounds without any concerns.

Features

- Options available include:
- 3 point linkage
- Full width lockable toolbox
- Demountable load platform for servicing
- Removable front cradle
- Full width front ballast weight
- Walk behind with dual controls
- All weather seat at rear
- Many more features considered "standard" included, contact us for details
