

Fast FENCER

Manufactured in Australia by Warwick Gates

The FastFencer saves heavy lifting, labour costs, and helps build a better fence quicker.

Fencing in 5 easy steps with the FastFencer

1 Line up the 3 rolls

2 Lift and go

3 Drive the line

4 Tension and tie off

5 Reload and go again

Fast FENCER

Manufactured in Australia by Warwick Gates

www.quikfence.com.au | 1800 062 723

**No more lifting
a heavy roll,
ever again.**

**Prices start from
\$8,470^{Inc GST}**

The FastFencer has clamps on both sides of the machine, to allow you to fence in either direction around your property. Once you've picked up your three rolls of netting, tie it to your first strainer, and run down the line. Then to tie it off to your next strainer, clamp the mesh tight from your cabin seat, tension the wire by simply driving the parent machine forward to the desired tension and tie it off.

FFD1300/2400

The FFD1300/2400 suits skid steers, and smaller tractors. Using the QuikFencer makes it so much easier, safer and quicker.

- 3 roll capacity up to 250 metre lengths
- Perfectly suited for running out standard hinge joint, fabricated netting and Wallaby netting
- Compact and lighter weight provides a stable process when running out netting on smaller machines
- Ideal for hilly country
- **Dimensions:** 1300 high x 2400 wide x 850 deep, weighs 540kg

The FFD1300/2400 is ideal for sheep, goats and other livestock, tree protection, internal and external fencing.

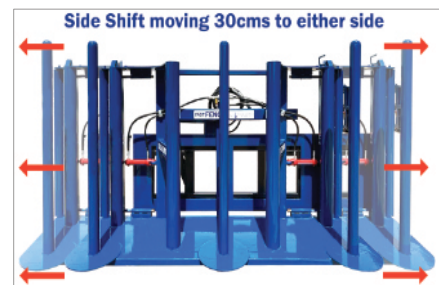

FFD1300/3000

The FFD1300/3000, the 3 metre width is ideal for tractors, backhoes, loaders, telehandlers so the fence netting doesn't snag on the wheels.

- 3 roll capacity up to 250 metre lengths
- A 3m wide FastFencer provides clearance when running out hinge joint on larger machines
- Ideal for open country
- **Dimensions:** 1300 high x 3000 wide x 850 deep, weighs 565kg

The FFD1300/3000 is ideal for sheep, goats and other livestock, tree protection, external and internal fencing.

FFD1300/2400/Side Shift

The FFD1300/2400/Side Shift allows the whole machine to move 300mm to the left or the right, just like the forks on a forklift. This allows the FastFencer to move to and from the line without moving the parent machine, plus reduce wide load issues when transporting.

- 3 roll capacity up to 250 metre lengths
- Suits standard hinge joint, Wallaby netting and fabricated netting
- Provides more control, stable process and manoeuvrability
- Suits hilly and open country
- **Dimensions:** 1300 high x 2400 wide x 850 deep, weighs 580kg

The FFD1300/2400 is ideal for sheep, goats and other livestock, tree protection, internal and external fencing.

Free call 1800 062 723

Cost of hitches is dependant on parent machine and freight costs are not included.

- Suits fabricated netting, Wallaby netting, exclusion and feral netting
- **Dimensions:** 2100 high x 2400 wide x 850 deep, weighs 830kg, 500 metre roll model weighs 850kg

The FFD2100/2400/Side Shift suits livestock fencing, tree protection, exclusion and protection, external and internal fencing.

Versatility with Bolt on Hooks

The same FastFencer, can go on different Machines

www.quikfence.com.au | 1800 062 723

Option to change FastFencer attachment to suit the parent machine

The FastFencer provides the ultimate in versatility to suit a farmer or fencing contractor.

Depending on the purpose of the fence, whether it is intended to keep out pests, protect crops, livestock, property or the family home, can make a huge difference to the fencing machinery and supplies required. The Bolt on Hook Plate allows the same FastFencer to be attached to a nimble skid steer for heavily treed land, a sturdy telehandler for a variety of conditions, or a heavy tractor for an exclusion fencing project. Over the lifetime of the FastFencer, the operator could use the machine for;

- Sheep or Cattle fencing
- Crop protection for broadacre farming
- Organise an acreage to suit your lifestyle property dreams
- Internal fencing to organise stock and small crops
- Exclusion fencing covering 100s of kilometres

The option of a Bolt on Hook plate makes the FastFencer more versatile and useful over a longer lifetime contact us to discuss the best option for you.

Hitch prices are;

- Euro Hitch, Challenger and most Skid Steers start at \$440 + GST = \$484
- John Deere: \$935 + GST = \$1,028.50
- Telehandler most models price start at \$825 + GST = \$907.50

Please note; Due to the current volatility in steel prices, plus individual custom orders may alter the final price of hitches and prices will be confirmed at time of placing the order.
