

PATENT PENDING

# The Gate Wheel

MAKING LIGHT WORK OF HEAVY GATES

***Add the Gate Wheel  
to your existing steel  
gate for an easy opening!***

*“Perfect, no more  
dragging that big  
heavy gate!*

*...and it was quick  
to add too!”*

The Gate Wheel is low maintenance and ideally suited for your home, farms, rural properties and businesses. Adding the Gate wheel will help reduce any potential OH&S issues for the workplace or home to make light work of opening heavy steel gates.

How many Gate Wheels will you need?

# The Gate Wheel

MAKING LIGHT WORK OF HEAVY GATES

## Assembly instructions

*"Perfect, no more dragging that big heavy gate!"*

1. Prepare the gate, add to an existing mesh gate, cut a space to fit the wheel. Allow 200mm in height and 185mm in width as a minimum space for the wheel to move freely.
2. Place axle brackets over bottom rail of the gate.
3. Place both halves of the wheel over the axle bracket.
4. Place all bolts through the four outer holes and secure the two halves together tightly.
5. Place the remaining two bolts through the axle bracket and wheel halves and tighten.
6. Fix brackets either side of the wheel on the gate to keep the wheel in place with tek screws supplied.
