The ground breaking features of the PostPuncher include;

- PostPuncher makes it impossible for bystanders or workers to be injured from a falling hammer when operating in accordance with the manufacturer's instructions.
- Drive any length post, on any angle with no height restrictions.
- The PostPuncher can be transported, unattached and connected to almost any hydraulic machine.
- Easy to connect and remove from existing machinery.
- Attaches to almost any vehicle.
- The most efficient post driver on the market as you do not leave your seat.
- Allows the operator to drive posts in angles of 45 degrees and upwards.
- Works easily in difficult terrain, it can be operated on slopes, in the bush, incredibly versatile and robust.
- Work over hedges or existing fences, on riverbanks and over ditches.
- The PostPuncher has the ability to drive a post where you struggle to walk.
