Fencing made easy

THUNDERPRO

Power for ground breaking results

SILENCED

Why get a Silenced model?

The Silenced model has the same internal operating mechanism as the Open Jacket. The Silenced model has a complete heavy duty steel case wrapped around the mechanism. This strengthens, protects it, keeps dust out of the workings and dampens the vibration.

This is the ideal model for daily usage.

OPEN JACKET

ThunderPro: Percussion Power

The ThunderPro Post Driver delivers powerful percussion force to drive posts into hard and rocky ground, giving farmers and fencing contractors dependable performance in tough conditions.
