

RESOLUTION 2014-06

A RESOLUTION TO MODIFY A BOOKKEEPING PROCEEDURE DETAILED IN THE INTERLOCAL AGREEMENT OF 1975 WHEREIN THE CITIES OF COTTER AND GASSVILLE AGREED TO CERTAIN TERMS AND CONDITIONS RELATIVE TO THE JOINT OPERATION OF THEIR WASTEWATER TREATMENT SYSTEM

It has been the practice of the cities to evaluate the percentage of use of the wastewater facility by each city, and such evaluation has taken place in the month of January each year. This allowed that percent of usage for the previous year, by each city, could be determined.

Waiting until January to determine relative statistics renders it difficult to budget for the new year since budget processes usually start in the Fall of the year coming to a close. When the percentage of use changes, the cities may pay more or less than was their share.

To alleviate this problem be it resolved that the method of determining the use will continue as it has been, except that annual statistics will be evaluated using figures starting from the first day of October of one year through the last day of September of the following year. Any change to the percentage paid by either city will still be effective on the first day of January in the new year.

So that this process can start immediately, it is further resolved that since records for the current 12 month period are available, usage rates from October 1st of 2013 through September 30th of 2014 will be used to determine usage rates for the year 2014.

Adopted this 20th day of November, 2014.
