Dear Resident / Business Owner:

**Re: Redwood Meadows Phase 1 Water and Wastewater Replacement
Public Notification of Geotechnical and Site Surveys**

Please be advised that MPE a division of Englobe will be performing geotechnical investigations and site surveying in your area on behalf of Townsite of Redwood Meadows and the Tsuut'ina Nation.

Site Survey Schedule: **September 21, 2026, to September 25, 2026.**
Geotechnical Schedule: **October 5, 2026, to October 16, 2026.**

Please note that these dates are subject to change due to weather conditions or unforeseen circumstances.

The scope of work is as follows:

- Drone photography survey and GPS site measurements.
- Geotechnical bore holes excavations.
- Installation of groundwater monitoring wells.

For your safety and the safety of our workers, we kindly ask that you:

- Stay clear of all survey and geotechnical equipment and excavation areas.
- Observe all posted traffic signs and barricades.
- Supervise children and pets near the construction zone.

We appreciate your patience and cooperation while this important work is completed. Every effort will be made to complete the site investigations safely, efficiently, and with minimal inconvenience.

Yours truly,

MPE a division of Englobe

We will also be doing a geotechnical investigation in the Phase 1 area ~~October 5-7~~. This will include drilling 19 boreholes on the side of the roads and installing groundwater standpipes with stick-up well protectors. After the boreholes are staked out, we plan to have a meeting onsite to review the locations with you and ensure there are no conflicts that you are aware of with these locations. They will be in place for about one year so we can monitor groundwater levels and they will look something like the photo below. Note that we have ordered utility locates for this geotechnical work so you will start to see utilities being marked out as soon as next week.
