Implementation ISO 45001 Occupational Health & Safety Management System

Dear Valued Business Partners

We are pleased to share that we have now begun the implementation of the ISO 45001 Occupational Health & Safety Management System (OHSMS), supporting our ongoing commitment to a safe and healthy working environment. Through this process, we continue to strive to promote and maintain high standards of workplace health and safety for all our employees, customers, suppliers, contractors, service providers and visitors.

ISO 45001 is an internationally recognised standard that helps organisations create safer working conditions, reduce risks, comply with legal requirements and continually improve their approach to protecting employees, customers and partners. The standard is built around the Plan–Do–Check–Act (PDCA) cycle, ensuring that health and safety performance is monitored, reviewed and improved on an ongoing basis.

At Stantone Mechanical Handling Limited, we believe that by implementing the ISO 45001 Standard and our new Occupational Health & Safety Management System, we can:

- Strengthen our focus on safe working practices and risk prevention.
- Improve the consistency and reliability of our health & safety processes.
- Enhance employee wellbeing and create a safer working environment.
- Demonstrate our commitment to legal compliance and responsible operations.
- Embed a culture of continuous improvement through the PDCA approach.

You will be able to follow our progress in implementing the ISO 45001 Standard, along with our Quality, Environmental and Health & Safety Policies, by visiting our website:

- [Stantone Mechanical - Forklift truck Hire, Sales & Service](#)

Should you require further information or have any questions, please contact us on:

- info.gehs@stantone.co.uk

Thank you for your continued support and partnership.

Kind Regards

Nigel Martin
