CBS-10K

10 kW PEAK SINGLE OUTPUT DC/DC CONVERTER

GENERAL FEATURES:

High input-output isolation 5000 V_{rms}
Remote off opto-coupled
Alarm by isolated relay contacts
Remote control via RS232
CAN BUS (optional)
Redundant configuration
Railway version EN50155
Fire and smoke: EN45545-2 approved
Up to 10 kW during 40 s
O-ring output diode up to 2000V

DESCRIPTION

The CBS-10K series consists of DC/DC converters, with a galvanic isolation between input and output, operating at fixed switching frequency.

The unit can deliver up to 6 kW average and up to 10 kW during 40s (see data table) being protected against overload and short-circuits.

The unit includes an ORing diode at the output to decouple it from lines up to 2 kV

START-UP

- The unit has 6 threaded M4 holes for the fixation on a mounting surface (maximum deep 5 mm)
- The unit has internal fans. For an appropriate cooling, the air input and output should be free of elements that cause an air flow reduction (minimum recommended distance to other objects 90mm).

- **For safety reasons, the following requirements must be met:**
- Provide the equipment with some kind of protective enclosure that complies with the electrical safety directives in effect within the country where the equipment is installed.
- Include an external input overcurrent protection (fuse or breaker) with a rating immediately higher than the maximum input current.
- Use cables of adequate cross-section to connect inputs and outputs. The following table lists the maximum currents and the minimum cross-sections for the cables used for each power connection.

	Input 24 V	Input 48 V	Input 72 V	Input 110 V	Output 500 V
Maximum current	320 A	310 A	209 A	137 A	10 A
Cable cross-section	**95 mm^2**	**95 mm^2**	**50 mm^2**	**25 mm^2**	**2.5 - 4 mm^2**

RS232 communication port

It is possible to control and monitor de unit via RS232 by means of an application tool named PAM. This application is free and can be downloaded from the Premium website.

Also it is possible to control and monitor de unit directly using the protocol showed in table:

Protocol configuration: ASCII code, 9600 bauds, parity none, 8 bits, 1bit stop

CE EU DECLARATION OF CONFORMITY

The undersigned, representing the following:

Manufacturer: PREMIUM, S. A.,
Address: C/ Dolors Aleu 19-21, 08908 L'Hospitalet de Llobregat, SPAIN

herewith declares that the product:

Type: DC/DC converter
Models: **CBS-10K-6001 … 6005**

is in conformity with the provisions of the following EU directive(s):

2014/35/EU SI 2016 No 1101	Low voltage / The electrical equipment (safety) regulations
2014/30/EU SI 2016 No 1091	EMC / Electromagnetic compatibility regulations
2011/65/EU Annex II and its amendment 2015/863/EU SI 2012 No. 3032	RoHS / Restriction of the use of certain hazardous substances in electrical and electronic equipment

and that standards and/or technical specifications referenced below have been applied:

N 62368-1: 2014	Safety. Audio/video information and communication technology equipment
EN 61000-6-3: 2007	Generic emission standard
EN 61000-6-2: 2005	Generic immunity standard
EN 50155: 2017*	Railway applications. Electronic equipment used on rolling stock material
EN 50121-3-2: 2016*	Railway applications. EMC Rolling stock equipment

* Optional, See annexe

CE marking year: **2021**

Notes:

For the fulfilment of this declaration the product must be used only for the aim that has been conceived, considering the limitations established in the instructions manual or datasheet.
