

PROJECT CONCLUSIONS AND FOLLOW UP

Final transnational meeting

On 14th March 2023 the project partners met in Istanbul, Turkey in a transnational partners meeting hosted by Tuzla Halk Eğitimi Merkezi, with the aim to:

- Overview the project intellectual outputs
- Plan the organization of national multiplier events
- Preparing the final tasks of the project.

PARTNESHIP

During the last face to face meeting in Turkey, the partners had also the opportunity to:

- discuss lessons learned from the implementation of each activity
- discuss the level of efficiency of the consortium's communication and collaboration
- plan actions for sustainability and exploitation of project results, outputs and outcomes.

Follow up

In the last stage of the project the partners, guided by Casa Eslava from Spain and I&F Education from Ireland, developed a **Sustainability Plan**, to set strategies, activities and resources to ensure the sustainability of project results, outputs and outcomes.

This action plan has two main goals:

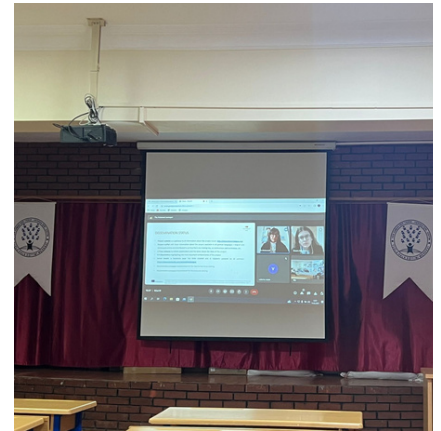

- to increase the scope of the outcomes
- to leverage the benefits of the created partnerships.

The project consortium bases its strategy on a strong communication plan and on the establishment of a network based in a community of interests.

Partners have reported on the different ways they aim to keep the project running into the future (funders and sources and strategies):

- liaising with **local stakeholders** to organise local seminars;
- spreading the project and its outcomes to **European contacts and countries**;
- interacting and conversing with **stakeholders** who are **in charge of policy, justice and education**;
- ensuring **continuous dissemination** of the available training materials and the e-course to practitioners and volunteers;
- introducing RDaVR to **future projects** co-funded by the European Commission as potential **for complementarity**.

among others.
