Standard compliant

### **USES**

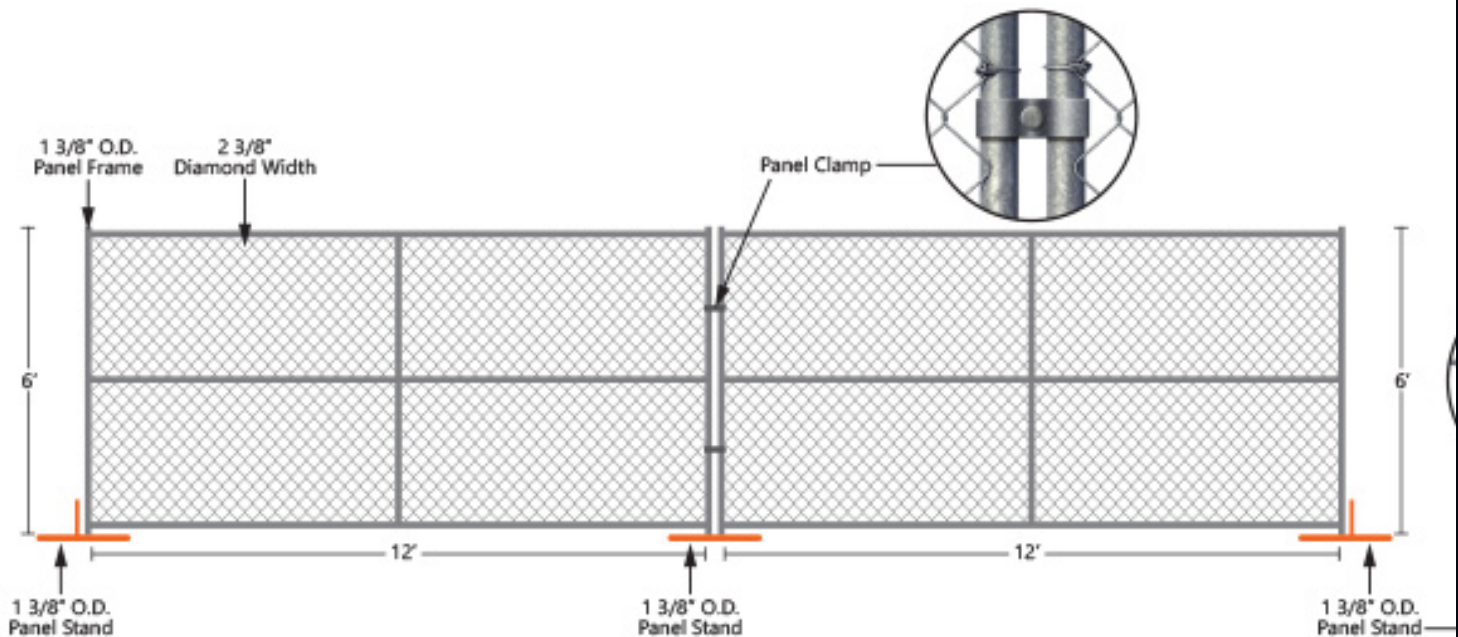

- Public Works Projects
- Tenant improvement and remodels
- Commercial Construction

Optional Sand Bags for Extra Stability

Footings are constructed from galvanized 1-3/8" diameter tubing and welded into an approximate 16" x 36" rounded rectangles, with two smaller diameter uprights welded in place to accept the outer frame, these stands ensure stability and reliability. Each panel is further reinforced with panel clamps for even greater support.
