- 2-Year Warranty

BUSHBIKE

Leasing How does it work?

We offer the BushBike on a minimum 12-month lease to provide companies with a low-capex, flexible fleet solution. The structure is simple and transparent:

- Minimum lease term: 12 months
- Two options available:
 - DIY lease (excl. service): client handles maintenance internally
 - Full-service lease (incl. service): maintenance and technical support included (currently available in Windhoek) with a fixed monthly fee for predictable budgeting.

After 12 months, the option to purchase the bike at 50% of the official list price (residual value)
Ideal for fleet testing, contract-based deployments, and scaling without upfront investment.

BUSHBIKE

Service, Maintenance & Spare Parts

- BushBike service is designed to be simple and DIY-friendly.
- No specialised technicians or complicated tools needed.
- Any good bicycle shop or the user can handle most routine maintenance work.
- Bike uses standard components and straightforward mechanical systems.
- Faster turnaround, lower downtime, and cheaper and easy maintenance support wherever the bike is operating.
