Dear Friend,

When I look back at where Wells 4 Wellness began, my heart is completely overwhelmed with gratitude. We started this journey in Illinois, and to this day, close to 75% of you, our most generous and steadfast supporters, are from the Illinois, Iowa, and Wisconsin area. You are the foundation of this ministry, and we could not do this without you.

As we grow, we are constantly looking for ways to be the best possible stewards of the gifts you entrust to us. Recently, we made the big decision to legally move the charity from Illinois to Utah. The red tape and large administrative fees in Illinois were simply holding us back. Now that we are established in Utah, our overhead is significantly lower. This means we are more efficient, we are thriving, and we are working harder than ever to do what we were called to do, which is to drill more wells and bring life-saving water to those who need it most. Praise God!

This newfound efficiency has inspired us to set our most ambitious goal yet. In 2026, we are aiming to drill 60 new wells. We are already off to an incredible start this year. By God's grace, we have drilled two wells in Zimbabwe, five in Uganda, and five in Niger. I want to reassure you that we are absolutely not leaving Niger. The need there remains immense, and we have firmly committed to drilling 40 wells in Niger alone this year. We currently have wells flowing in seven different countries, and our hearts are being pulled to expand to even more.

In February, Willie took a scouting trip to Mexico, and what he witnessed among the indigenous Tarahumara people was deeply moving. The need for clean water in their communities is staggering. But God was already making a way! Willie met a group of Americans living full-time in the region, and amazingly, they already own a drilling rig. He had a wonderful meeting with them, brainstorming exactly how we can help train a team and mobilize that rig to start drilling in those remote villages.

The momentum does not stop there. We are currently building beautiful new relationships with church-planting organizations in both Guatemala and India. Lord willing, the doors will soon open to bring clean water and hope to these countries as well!

Also, World Water Day celebrates water and raises awareness of the 2.1 billion people living without access to safe water. Let's celebrate together on March 22nd. Would you consider hosting a "gathering with a purpose" in your home and show the Wells 4 Wellness Documentary with your friends & family?

We are stepping into a season of incredible growth, and I am so deeply thankful that you are on this journey with us. Your prayers and your generosity are literally changing lives across the globe.
