PARKi RESERVATIONS

OUR IN-HOUSE RESERVATION PAYMENT SOLUTION

Enables customers to prepay for Reserve parking for a period of time, within a day, or consecutive days.

CDS PARKING SYSTEMS

Download the PARKi app at **parkiapp.com.au**

Enables customers to prepay for Reserve parking for a period of time, within a day, or consecutive

SELECTING YOUR LOCATION

No need to know the name of the car park. Simply type a location and let our google optimised engine show carparks near-by your destination and direction from current location to the carpark. Time and date can be selected on the home page. This way we can tell you the currently availability and best rates of nearby carparks.

MAP AND LIST VIEW

You can easily navigate the map to find the parking that best suits your needs. The map and list view page lets you see everything at once so that you can compare car parks with ease.

LIST VIEW

The list view shows you all the nearby car parks to your search locations. In the list view you can see :

• Car park name
• Pricing
• Services offered at the car park

ENTRY

If a reservation registration is made through PARKi, then entry is authorised by presenting the users PARKi QR Code to be scanned on entry or is recognised by the user's licence plate number as part of their PARKi account detail.

EXIT

Exit from the car park is using either the user's PARKi QR Code App to be scanned at the exit station or if an LPR is installed, automatic recognition of licence plate will enable exit.

OVERSTAYS

If the reservation user overstays their paid reservation period, then payment can be made at the exit station by either using their PARKi QR Code linked to their credit card account or paying by credit card for the displayed value at the exit station.

PARKI APP BENEFITS

PARKI MOBILE APP

If a reservation registration is made through PARKi app, then entry is authorised by the user's licence plate number being recognised on entry as part of their PARKi account detail.

Exiting from the car park the users licence plate number is again recognised enabling the automatic

opening or the exit boom gate on.

DIRECTIONS

Within the app, integrated Google maps, enable the user to access directions from their current location to their nominated off street carpark.
