

CITYWATCH **SECURITY**

PROTECTING WHAT MATTERS
EDUCATION

WHAT SETS US APART

CityWatch provides security that understands students — not just the system.

We uphold exceptional security standards by offering tailored, child-safe, and education-aware protection across schools, childcare centres, and universities.

With over 30 years of experience, CityWatch understands the specific demands of educational settings and provides measured, professional support in sensitive environments.

CityWatch officers are specially trained in de-escalation, trauma-informed care, and child-safe practice. This makes them ideal for gate management, on-campus patrols, and behavioural incident response. They work seamlessly within learning spaces to minimise disruption, reduce staff burden, and help maintain a safe and supportive environment for students of all ages.

All CityWatch officers are fully vetted and hold valid Working With Children Checks.

CLOUD-BASED SYSTEMS DESIGNED FOR EDUCATION SECURITY NEEDS

CityWatch aids institutions to stay safe, compliant, and responsive with local cloud based systems. Features include secure CCTV with privacy masking, device-accessible incident reporting with full access logs, and encrypted data storage aligned with Australian child protection laws. Real-time alerts and escalation pathways ensure fast, effective responses.

Each education contract includes precision performance tracking and reporting, giving leadership full transparency and control. Live dashboards offer real-time insights, while incident data can be reviewed in line with internal policies.

CITYWATCH'S DEDICATED EDUCATION SECURITY

TRUSTED BY SCHOOLS, TAFES, AND UNIVERSITIES TO KEEP CAMPUSES CALM, COMPLIANT, AND LEARNING-READY

PRIVACY PROTECTION

Identity masking on CityWatch-installed cameras protects students and staff in classrooms and sensitive areas.

Every user action is audit-logged. Role-based permissions, single sign-in and multi-factor sign-in, encryption in transit and at rest, and redaction tools ensure only approved people can view, share, or export information.

Our systems meet Child Safe Standards and Australian privacy requirements.

REAL-TIME MANAGEMENT

CityWatch keeps campuses flowing steadily from gate to classroom.

Our respectful officers, smart access control and integrated CCTV feed a single, real-time view into our cloud platform and to routine patrols before, during or after hours.

Entry flows, visitor check-ins, and perimeter activity are managed in real time to reduce disruption and support Duty of Care.

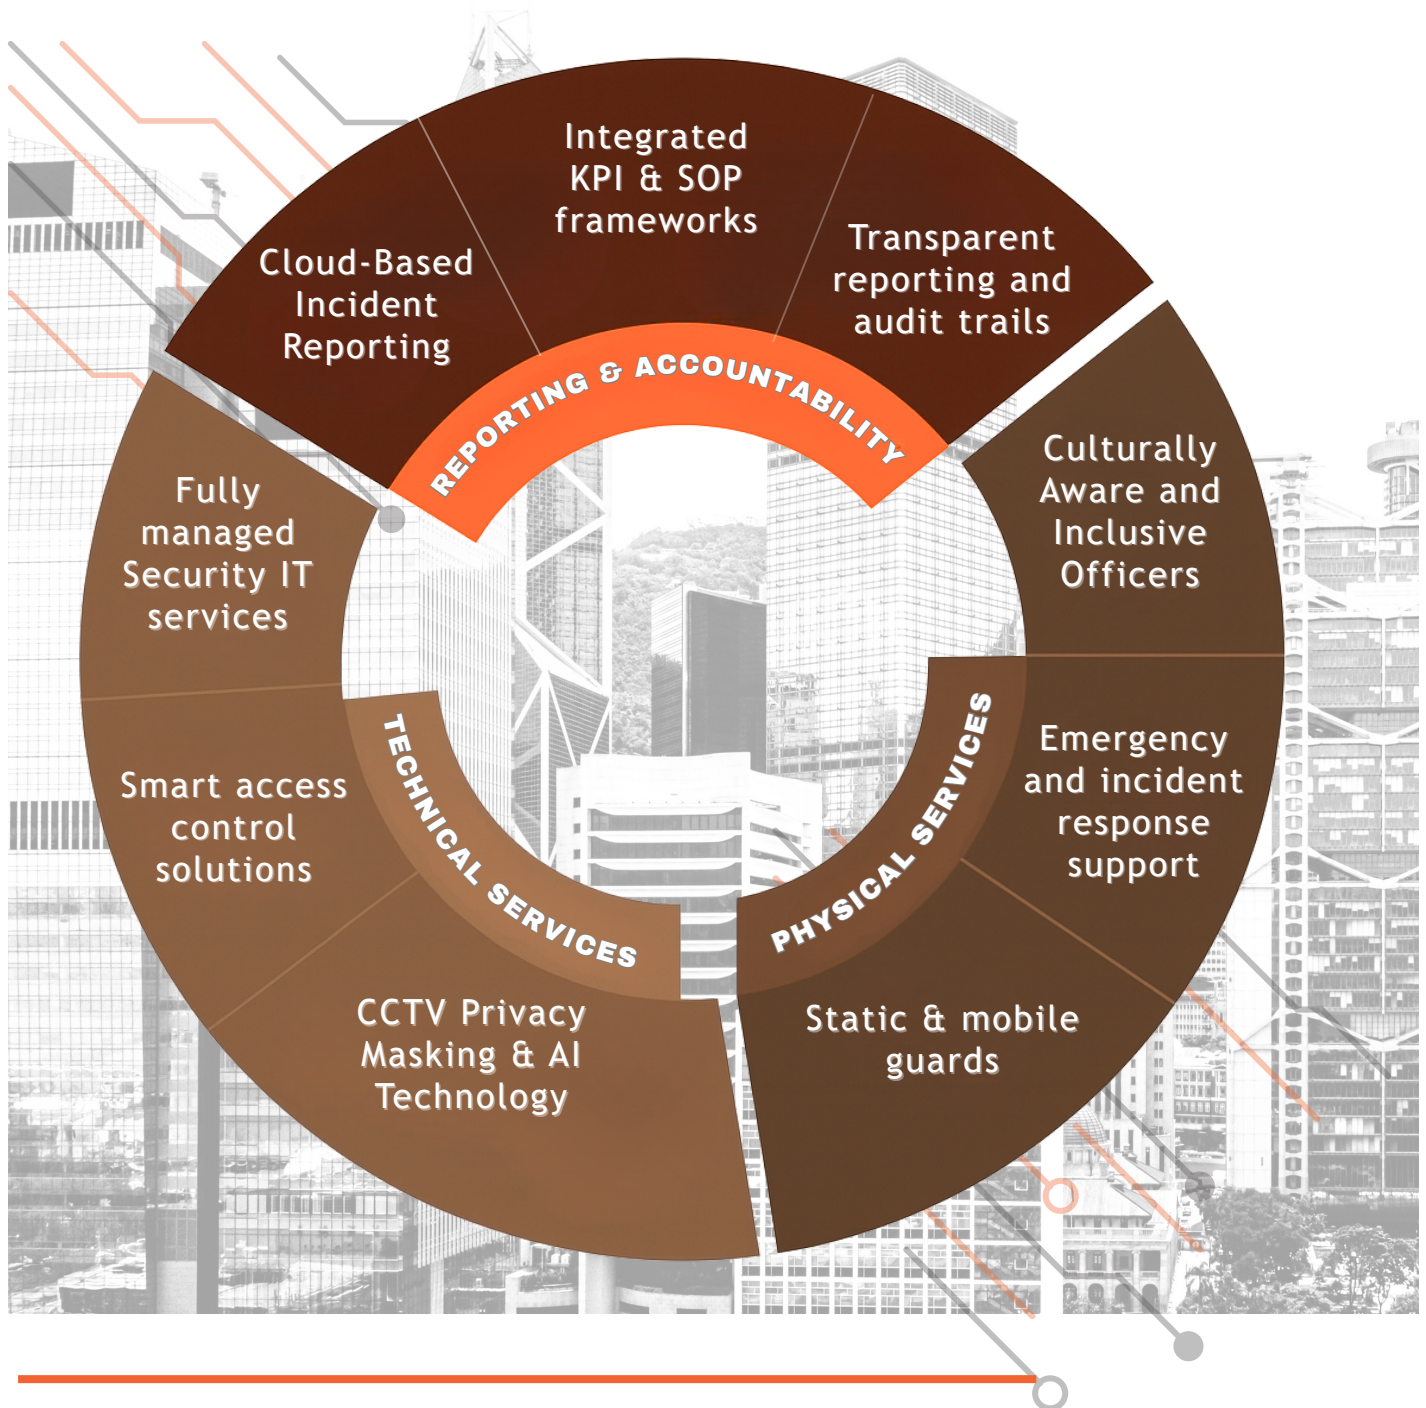

NO REST SECURITY

When the final bell goes, CityWatch's protection continues.

Static guards, mobile patrols, and remote video verification secure assets after hours. Smart rules trigger live alerts for doors, alarms, and cameras.

These smart rules enable rapid, verified responses that cut false callouts and speed escalation to leaders, police, or contractors.
